Big Data Science and Analytics for Smart Sustainable Urbanism Simon Elias Bibri,2019-05-30 We are living at the dawn of what has been termed the fourth paradigm of science a scientific revolution that is marked by both the emergence of big data science and analytics and by the increasing adoption of the underlying technologies in scientific and scholarly research practices Everything about science development or knowledge production is fundamentally changing thanks to the ever increasing deluge of data This is the primary fuel of the new age which powerful computational processes or analytics algorithms are using to generate valuable knowledge for enhanced decision making and deep insights pertaining to a wide variety of practical uses and applications This book addresses the complex interplay of the scientific technological and social dimensions of the city and what it entails in terms of the systemic implications for smart sustainable urbanism In concrete terms it explores the interdisciplinary and transdisciplinary field of smart sustainable urbanism and the unprecedented paradigmatic shifts and practical advances it is undergoing in light of big data science and analytics This new era of science and technology embodies an unprecedentedly transformative and constitutive power manifested not only in the form of revolutionizing science and transforming knowledge but also in advancing social practices producing new discourses catalyzing major shifts and fostering societal transitions Of particular relevance it is instigating a massive change in the way both smart cities and sustainable cities are studied and understood and in how they are planned designed operated managed and governed in the face of urbanization This relates to what has been dubbed data driven smart sustainable urbanism an

emerging approach based on a computational understanding of city systems and processes that reduces urban life to logical and algorithmic rules and procedures while also harnessing urban big data to provide a more holistic and integrated view or synoptic intelligence of the city. This is increasingly being directed towards improving, advancing and maintaining the contribution of both sustainable cities and smart cities to the goals of sustainable development. This timely and multifaceted book is aimed at a broad readership. As such, it will appeal to urban scientists, data scientists, urbanists, planners, engineers, designers, policymakers, philosophers of science and futurists, as well as all readers interested in an overview of the pivotal role of big data science and analytics in advancing every academic discipline and social practice concerned with data intensive science and its application, particularly in relation to sustainability.

Information Security Handbook Noor Zaman Jhanjhi, Khalid Hussain, Mamoon Humayun, Azween Bin Abdullah, João Manuel R.S. Tavares, 2022-02-17 This handbook provides a comprehensive collection of knowledge for emerging multidisciplinary research areas such as cybersecurity, IoT, Blockchain, Machine Learning, Data Science and AI. This book brings together in one resource information security across multiple domains. Information Security Handbook addresses the knowledge for emerging multidisciplinary research. It explores basic and high level concepts and serves as a manual for industry while also helping beginners to understand both basic and advanced aspects in security related issues. The handbook explores security and privacy issues through the IoT ecosystem and implications to the real world and at the same time explains the concepts of IoT related technologies, trends and future directions. University graduates and postgraduates as well as research scholars, developers and end users will find this handbook very useful.

International Conference on Advanced Intelligent Systems for Sustainable Development (AI2SD'2023) Mostafa Ezziyyani, Janusz Kacprzyk, Valentina Emilia Balas, 2024-02-20 This book is a comprehensive compilation of groundbreaking insights stemming from the esteemed International Conference on Advanced Intelligent Systems for Sustainable Development AI2SD 2023, hosted at Cadi Ayyad University, Morocco. Focused on the crucial themes of energy, environment, agriculture and industry, this book captures the essence of transformative discussions and cutting edge research that unfolded during the conference. Within these pages, readers are invited to explore the intricate world of intelligent systems where innovation converges to tackle the key challenges of sustainability. The book immerses its audience in a wealth of knowledge that deeply represents the latest advancements shaping the future landscape. Diverse topics are intricately woven into the fabric of this discourse, covering AI driven solutions designed for energy

optimization environmental sustainability precision agriculture and intelligent industry applications Each contribution serves as a testament to the collaborative efforts of researchers practitioners and experts who gathered to drive innovation at the intersection of intelligent systems and sustainable development Crafted as an invaluable resource Advancements in Intelligent Systems AI2SD 2023 Proceedings caters to a diverse readership eager to delve into the forefront of trends and developments emerging from the crossroads of advanced intelligent systems in energy environment agriculture and industry Whether you re a researcher practitioner or enthusiast unlock the transformative potential inherent in these innovative domains

Security, Privacy and User Interaction Markus Jakobsson, 2020-10-27 This book makes the case that traditional security design does not take the end user into consideration and therefore fails This book goes on to explain using a series of examples how to rethink security solutions to take users into consideration By understanding the limitations and habits of users including malicious users aiming to corrupt the system this book Illustrates how better security technologies are made possible Traditional security books focus on one of the following areas cryptography security protocols or existing standards They rarely consider the end user as part of the security equation and when they do it is in passing This book considers the end user as the most important design consideration and then shows how to build security and privacy technologies that are both secure and which offer privacy This reduces the risk for social engineering and in general abuse Advanced level students interested in software engineering security and HCI Human Computer Interaction will find this book useful as a study guide Engineers and security practitioners concerned with abuse and fraud will also benefit from the methodologies and techniques in this book
