## **ENCYCLOPAEDIA OF INTERNATIONAL AVIATION**

**LAW PHILIP FORSANG NDIKUM**,2013 The four volumes of the Encyclopaedia of International Aviation Law are intended for students lawyers judges scholars and readers of all backgrounds with an interest in Aviation Law and to provide the definitive corpus of relevant national and regional legislation including global aviation treaties and legislation to enable all readers without exception to develop the background knowledge and tools to understand local regional and international Aviation Law in contextual fashion The first volume has a detailed text of country legislation including national cases and materials whilst the second third and fourth volumes focus on International Aviation Law Treaties international cases and materials and Aircraft Refueling Indemnity TAR BOX Agreements *Rulemaking in Air Transport* Ruwantissa

Abeyratne,2016-09-29 This book embarks on a discussion of rulemaking in air transport its processes and legalities starting with a deconstruction of work carried out at the time of writing in various fields of air transport by the International Civil Aviation Organization ICAO which should be at the apex of rulemaking This initial discussion which demonstrates the weakness of rulemaking in the air transport field for lack of direction purpose and structure in the development of authoritative rules and regulations that should serve as compelling directives from the main organization responsible for aviation leads to an evaluation of the fundamental principles of rulemaking in ICAO the Federal Aviation Administration FAA of the United States and the European Commission EC **Aviation Safety through the Rule of Law** J. Huang,2009-08-07 Flight is inherently a risky venture carried out in a hostile environment at great speed Realistically and regrettably a commitment to aviation safety can achieve no more than as few accidents as possible Moreover the tragic events of 11 September 2001 have conclusively demonstrated that aviation safety goes beyond accident prevention from a technical point of view and extends to more profound political strategic and legal dimensions Accordingly aviation safety requires a multidisciplinary approach technical economic managerial and legal This ground breaking study analyzes from a legal point of view the mandate of the International Civil Aviation Organization ICAO relating to aviation safety in the light of changes which have taken place since the conclusion of the Chicago Convention including the expansion of the international civil aviation community the liberalization of the aviation industry the introduction of new technology and existing as well as new and emerging terrorist threats The author clearly demonstrates that ICAO as the worldwide governmental organization for international civil aviation should be allowed a more proactive role in enhancing aviation safety Describing in great detail the contributions of ICAO to the global safety regime and mechanisms he submits effective ways to rationalize ICAO s quasi legislative and enforcement functions in order to enhance aviation safety through the rule of law Among the important topics arising in the course of the analysis are the following global ramifications of national and regional initiatives auditing of state compliance with international standards characterization of crimes against the safety of civil aviation importance of ensuring that safety requirements are not compromised by profit considerations burgeoning of airline alliances code sharing and

outsourcing activities demands for simplification and unification of certain regulatory procedures prohibition of the use of weapons against civil aircraft in flight development of new technology such as satellite based navigation systems and importance of the rule of law and the system of checks and balances in international organizations As a plea to consider civil aviation safety obligations not only as merely contractual obligations between States but as obligations owed to the international community as a whole this book is sure to give rise to far reaching discussions and follow up among policymakers and the interested legal community in the years to come

### **International Regulation of Non-Military Drones**

Anna Masutti, Filippo Tomasello, The increasing civilian use of Unmanned Aircraft Systems UASs is not yet associated with a comprehensive regulatory framework however new rules are rapidly emerging which aim to address this shortfall This insightful book offers a thorough examination of the most up to date developments and considers potential ways to address the various concerns surrounding the use of UASs in relation to safety security privacy and liability

Англо-русский словарь терминов и понятий международного воздушного права, 2023-10-31 *Aviation Law & Air Transport Management* Mr. Rohit Manglik, 2023-09-23 Covers legal frameworks governing air transport airline regulations liability and international agreements for safe and efficient aviation systems *The Economic Effects of Air Transport Market Liberalisation* Eyden Samunderu, 2024-09-19 This book rigorously examines the air transport market liberalisation process on the African continent and presents key highlights challenges and impediments to embracing an open skies market environment in Africa It focuses on the economic impact of air transport liberalisation policy constraints challenges of harmonisation and regional economic integration and its impact on air transport development employing a quantitative assessment based on the Air Transport Liberalisation Index ALI to evaluate how an open skies policy would change the competitive dynamics of air transport in Africa Adopting a two tier gravity model the book explores how demand and route networks would be impacted by the deregulation of the air transport market The book also applies a historical perspective by evaluating the initial ratification of the Yamoussoukro Declaration 1999 which acted as a catalyst for Africa's 2063 regional agenda focused on establishing the Single African Air Transport Market SAATM The book also provides a comprehensive analysis of the African Continental Free Trade Area AfCFTA exploring its multifaceted impacts on Africa's single market from economic regulatory and sustainability perspectives This includes an introduction to the AfCFTA highlighting its inception as a major step towards continental economic integration aimed at enhancing intra African trade promoting sustainable development and fostering industrial diversification It then examines the capacity and competency building of African aviation personnel Training gaps and skills are extensively evaluated to ensure that the African region is prepared for the new competitive equilibrium post SAATM The book also raises critical questions regarding the status of the African air transport market Firstly with the introduction of an open skies policy in Africa will the national flag carriers be able to

compete under the new market dynamics Will the SAATM become a game changer in paving the way for the privatisation of some of Africa s poor performing airlines Will the SAATM create a competitive market and a shift in airfares How will policymakers deal with the excessive aviation taxes fees and charges that make airfares in Africa the highest in the world What will the economic benefits be for signatory states that embrace the SAATM Will there be a significant growth trajectory in terms of air travel demand This book is intended for researchers studying air transport economics in developing markets graduate students with a primary focus on air transport development senior policymakers and professionals at governmental agencies and industry practitioners who want to expand their understanding of the dynamics shaping Africa s air transport landscape     Assessment, Measurement and Reporting of Runway Surface Conditions ,2012
