

A classification of diseases can be defined as a system of categories to which specific entities are assigned according to established criteria. The purpose of the ICD is to permit the systematic recording, analysis, interpretation and comparison of mortality and morbidity data collected in different countries or areas and at different times. This year holds the procedural keys to unlock the substantive text caused by the tentative labeling "ICD-10-CM". I expect that you will use this text to translate diagnoses of diseases and other health problems from words into an alphanumeric code, which permits easy storage, retrieval and analysis of the medical coding data.
