Constructed Ecologies Margaret Grose, 2017-03-16 Today designers are shifting the practice of landscape architecture towards the need for a more complex understanding of ecological science *Constructed Ecologies* presents ecology as critical theory for design and provides major ideas for design that are supported with solid and imaginative science In the questioning narrative of *Constructed Ecologies* the author discards many old and tired theories in landscape architecture With detailed documentation she casts off the savannah theory critiques the search for universals reveals the needed role of designers in large scale agriculture abandons the overlay technique of McHarg and introduces the ecological and urban health urgency of public night lighting Margaret Grose presents wide ranging new approaches and shows the importance of learning from science for design of going beyond assumptions of working in multiple rather than single issues of disrupting linear design thinking and of dealing with data This book is written with a clear voice by an ecologist and landscape architect who has led design students into loving ecological science for the support it gives design

Ice Ages and Astronomical Causes Richard A. Muller, Gordon J. MacDonald, 2002-08-26 It is not possible to understand the present or future climate unless scientists can account for the enormous and rapid cycles of glaciation that have taken place over the last million years and which are expected to continue into the future A great deal has happened in the theory of the ice ages over the last decade and it is now widely accepted that ice ages are driven by changes in the Earth's orbit The study of ice ages is very interdisciplinary covering geology physics glaciology oceanography atmospheric science planetary orbit calculations astrophysics and statistics

Global Land Ice Measurements from Space Jeffrey S. Kargel, Gregory J. Leonard, Michael P. Bishop, Andreas Kääb, Bruce H. Raup, 2014-07-08 An international team of over 150 experts provide up to date satellite imaging and quantitative analysis of the state and dynamics of the glaciers around the world and they provide an in depth review of analysis methodologies Includes an e published supplement *Global Land Ice Measurements from Space Satellite Multispectral Imaging of Glaciers* GLIMS book for short is the leading state of the art technical and interpretive presentation of satellite image data and

analysis of the changing state of the world's glaciers. The book is the most definitive comprehensive product of a global glacier remote sensing consortium. Global Land Ice Measurements from Space (GLIMS) <http://www.glims.org>. With 33 chapters and a companion e-supplement, the world's foremost experts in satellite image analysis of glaciers analyze the current state and recent and possible future changes of glaciers across the globe and interpret these findings for policy planners. Climate change is with us for some time to come and its impacts are being felt by the world's population. The GLIMS Book, to be released about the same time as the IPCC's 5th Assessment report on global climate warming buttresses and adds rich details and authority to the global change community's understanding of climate change impacts on the cryosphere. This will be a definitive and technically complete reference for experts and students examining the responses of glaciers to climate change. World experts demonstrate that glaciers are changing in response to the ongoing climatic upheaval in addition to other factors that pertain to the circumstances of individual glaciers. The global mosaic of glacier changes is documented by quantitative analyses and are placed into a perspective of causative factors. Starting with a Foreword, Preface, and Introduction, the GLIMS book gives the rationale for and history of glacier monitoring and satellite data analysis. It includes a comprehensive set of six 'how-to' methodology chapters, twenty-five chapters detailing regional glacier state and dynamical changes, and an in-depth summary and interpretation chapter placing the observed glacier changes into a global context of the coupled atmosphere-land-ocean system. An accompanying e-supplement will include oversized imagery and other highly visual renderings of scientific data.

The Ice Age Jürgen Ehlers, 2022. Nothing new from the Ice Age. Far from it. Barely ten years have passed since the first edition of this book was published, but in that time researchers around the world have developed new methods and published their findings in scientific journals. Consequently, ideas about the course of the Ice Age have changed dramatically. The sequence of the individual ice advances, the direction of ice movement, and the direction of meltwater drainage are only partially known but they can be reconstructed. This book offers in-depth information about the state of the investigations. Ice ages are the periods of the earth's history in which at least one polar region is glaciated or covered by sea ice. Thus, we are currently living in an Ice Age. The present Ice Age is also the period in which humans started to intervene in the shaping of the earth. The results are obvious. Aerial and satellite images can be used to trace the melting of glaciers but also the decay of the Arctic permafrost and the clearing of the Brazilian rainforest. This book is a translation of the original German 2nd edition *Das Eiszeitalter* by Jürgen Ehlers, published by Springer Verlag GmbH, Germany, part of Springer Nature, in 2020. The translation was done with the help of artificial intelligence machine translation by DeepL.com. A subsequent human revision was done primarily in terms of content so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and promotes technologies to support the authors. The author, Dr. Jürgen Ehlers, is a German geoscientist. Together with Prof. Philip L. Gibbard, Cambridge, he has led the project *Extent and Chronology of Quaternary Glaciations* for

the International Union for Quaternary Research involving 170 scientists from 50 countries Gibbard and Ehlers are among the best experts on glacial geology and were awarded the Medal of Merit of the German Quaternary Association DEUQUA Ehlers is the author of several books on the Quaternary Enke and Wiley and on the North Sea WBG and is also known as an author of historical crime fiction Ice Ages and Astronomical Causes Richard Muller, 2002 **Ice Ages** John Imbrie, Katherine Palmer Imbrie, 1979 This book tells the exciting story of the ice ages what they were like why they occurred and when the next one is due The solution to the ice age mystery originated when the National Science Foundation organized the CLIMAP project to study changes in the earth's climate over the past 700 000 years One of the goals was to produce a map of the earth during the last ice age Scientists examined cores of sediment from the Indian Ocean bed and deciphered a continuous history for the past 500 000 years Their work ultimately confirmed the theory that the earth's irregular orbital motions account for the bizarre climatic changes which bring on ice ages This is a tale of scientific discovery and the colorful people who participated Louis Agassiz the young Swiss naturalist whose geological studies first convinced scientists that the earth has recently passed through an ice age the Reverend William Buckland an eccentric but respected Oxford professor who fought so hard against the ice age theory before accepting it James Croll a Scots mechanic who educated himself as a scientist and first formulated the astronomic theory of ice ages Milutin Milankovitch the Serbian mathematician who gave the astronomic theory its firm quantitative foundation and the many other astronomers geochemists geologists paleontologists and geophysicists who have been engaged for nearly a century and a half in the pressing search for a solution to the ice age mystery Ice Ages Windsor Chorlton, Time-Life Books, 1983 *Ice Ages* Jon ERICKSON, 1990-05 *Ice Ages* Jonathon S. Erickson, 1990-05
