Design Change to Fishery Independent Surveys: When to Adjust and How to

Account For It Fabio Campanella, Ben Scouling, Nathan Bacheler, Kyle Shertzer, 2025-03-07 Fishery independent surveys provide crucial information for monitoring and assessing marine fish stocks. Their utility can largely be attributed to sampling procedures that are consistent across space and time such that observed dynamics can reasonably be assumed to reflect those of the population or community being studied. However, sometimes changes to the survey design become desirable or necessary. They may be desirable if the benefits of modification outweigh the benefits of consistency for example with improvements in sampling technology or efficiency, revised survey priorities or increased funding that allows for greater spatial coverage or temporal resolution. In other cases changes to the survey design may not be desirable but necessary for example when specific supplies or equipment become unobtainable or with reductions in funding, ship time or human resources.

Aerial Photography and Videography Using Drones Eric Cheng, 2015-10-30 Inexpensive consumer drones that offer ease of flight and high quality photography and videography have exploded on the market recently creating what can only be described as drone mania amongst a diverse range of potential users. Because camera carrying drones still really only exist on the edge between hobby and the mainstream there is still a lot of confusion about what these small drones are capable of doing. The decision to purchase one is just the first in a long stream of things a new owner must think about. *Aerial Photography and Videography Using Drones* is designed to help you make the most of the opportunities these nimble, affordable and accessible flying machines have created for aerial photography and videography. Within this definitive guide you'll learn about the following: the current state of camera drone equipment; how to become a competent drone operator; tips for getting the best aerial still images and videos; stories from aerial photographers and videographers from around the world; the current regulatory state for drone usage in the U.S.; techniques demonstrated in several videos you can download from peachpit.com along with pre-flight checklists and worksheets for flight training.

Feminist Research for 21st-century Childhoods B. Denise Hodgins, 2019-03-21 This book is a collection of feminist childhood studies stories from field research with educators, young children and/or early childhood student educators that explores the challenges, tensions and possibilities of common worlds research methods for the 21st century. Grounded in a common worlding orientation, the contributing authors grapple with complex methodological understandings within postqualitative practices within settler colonial states: Australia, Canada, South Africa and the United States. Each chapter presents a method the authors have put to work in their efforts to unsettle the interpretative power of Euro-Western developmental knowledges and anthropocentric frameworks to reimagine research amid the colonialist social and environmental challenges we face today. The researching stories act as provocations for generating innovative relational and emergent methods to attend to the complexity of 21st century childhoods. Just as developmental and sociological perspectives gave birth to new forms of inquiry within childhood studies in 19th century industrialization and 20th century urban change respectively, the 21st century requires novel

questions practices and methodologies to enhance the childhood studies lexicon In the field of childhood studies where settler colonial and neoliberal logics have so much clout such strategies are crucial Feminist Research for 21st century Childhoods is an important and relevant read for anyone working and researching with children *Best of Make: Volume 2* The Editors of Make:, 2015-08-28 After ten years Make has become one of most celebrated magazines to hit the newsstands and certainly one of the hottest reads If you're just catching on to the Maker Movement and wonder what you've missed this book contains the best projects and articles from the magazine Find out what keeps Makers coming back to Make with this assortment of DIY projects and articles selected by Make's editors Learn to Outfit your workshop and make some must have tools Build electronic projects from actuators to antennae Make things with Arduino and Raspberry Pi Create drones and robots Build noisemaking projects and musical instruments Augment your photo and video capabilities Make your own food soap ink and more *The Camera as Actor* Amy Cox Hall, 2020-11-29 Looking beyond the impact photographs have on the perpetuation and expression of social norms and stereotypes and the influence of the act of taking a photograph this new collection brings together international scholars to examine the camera itself as an actor Bringing the camera back into view this volume furthers our understanding of how and in what ways imaging technology shapes us our lives and the representations out of which we fashion knowledge base our judgments and ultimately act Through a broad range of case studies the authors in this collection make the convincing claim that the camera is much more than a mechanical device brought to life by the photographer This book will be of interest to scholars in photography visual culture anthropology and the history of photography **The Total Fishing Manual (Revised Edition)** Joe Cermele, 2017-05-09 A comprehensive guide to fishing including information on the best lures for particular fish picking the right rod and how to troubleshoot a boat's motor
