ENLIGHTENMENT ERA (1600 – 1800)

- The Enlightenment was a 17th century intellectual movement.
- It worked to limit the power of monarch governments (kings and queens) and religious leaders.
- Other important Enlightenment ideas include popular sovereignty and natural rights.
- John Locke believed the job of government was to protect the rights of people or be overthrown, and his ideas greatly influenced the American colonists.
- Major Enlightenment thinkers:
 - Locke = Natural Rights
 - Montesquieu = Separation of Powers
 - Voltaire = Freedom of Speech
- Enlightenment ideas led to the American Revolutionary War, the Declaration of Independence, U.S. Constitution, Bill of Rights, and the French Revolution.

INDUSTRIAL REVOLUTION (CONTINUED)

- Urbanization led to several negative effects:
 - Pollution
 - Dangerous working conditions
 - Long hours and low wages
 - Child labor
 - Slums and poor housing conditions
 - Cramped living spaces and rampant diseases
- Labor unions formed to combat terrible working conditions in factories and sought better pay, shorter hours, and improved conditions.
- Henry Ford – founder of the Ford Motor Company – used the assembly line to produce his cars fast and cheap. This revolutionized manufacturing and gave rise to specialized labor.

INDUSTRIAL REVOLUTION (1750 – 1900)

- The Industrial Revolution took place in the late 1700s in Europe and in the early 1800s in America, and it was a time of technological innovation.
- Improved agricultural technology, like steam-powered tractors and large-scale food processing factories led to increased food yields.
- Railroad linked cities, brought materials to factories more efficiently, increased trade between cities and countries, and allowed people to move more freely.
- Many people moved from rural areas to cities to find work in newly built factories, a movement known as urbanization.

Management As Reflected in Training Requirements for Professional Certification Walter Guerry Green, III, 2000 This study examined emergency management certification programs in order to understand what the training requirements for state emergency management certification reveal about the core functions of emergency management as conducted by emergency managers working in local jurisdictions Based on practices in the 23 certification programs managed by state emergency management agencies or professional associations at the time of the study qualitative content analysis identified a range of core functions practiced by those programs that specified training requirements in terms of specific courses The application of grounded theory techniques to interview data from certification program managers and state emergency management training officers in 50 states resulted in the development of the theory that training requirements are adopted to meet a variety of goals These goals include those appropriate to perceived needs of the sponsoring organizations and individual emergency managers as well as goals that seek to promote competent performance of emergency management tasks The list of core functions identified in state level certification programs generally agreed with a list of core functions

developed from the literature indicating that practitioners at the local state and federal level have a common understanding of the essential tasks of the evolving profession of emergency management as performed in local jurisdictions **CISSP**

The meaning of public authority under the Human Rights Act Great Britain: Parliament: Joint Committee on Human Rights,2007-03-28 Section 6 of the Human Rights Act HRA makes it unlawful for public authorities to act in breach of Convention rights UK courts have adopted a restrictive interpretation of the meaning of public authority potentially depriving numerous often vulnerable people from the human rights protection afforded by the HRA There has been little evidence of progress since the previous report on this matter HL 39 HC 382 7th report session 2003 4 ISBN 9780104004173 Chapter 2 examines developments in case law since 2004 and the Committee considers the Government s 2005 guidance on contracting for services in the light of the Human Rights Act takes a very negative approach to the difficulties facing the use of contracts to secure better the protection of human rights lacks accessibility and is difficult to understand and has little or no influence on the procurement policies of local authorities In Chapter 3 the Committee considers the case for further action to overcome the problems arising from a narrow interpretation of public authority It concludes that the practical implications of the current case law are such that some service users are deprived of a right to an effective remedy for any violation of their Convention rights The Committee has not seen any convincing evidence that providers would leave the public services market if they were subject to the duty to act compatibly with Convention rights despite the Government s premature and unsupported concerns about market flight In Chapter 4 the Committee considers steps which could be taken to resolve the problems identified including use of legislation to clarify the meaning of public authority in section 6 HRA through a separate supplementary and interpretative statute

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun,2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content

specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

shape memory alloy wikipedia - Jan 29 2022

web may 2023 in metallurgy a shape memory alloy sma is an alloy that can be deformed when cold but returns to its pre

deformed remembered shape when heated it is also known in other names such as memory metal memory alloy smart metal smart alloy and muscle wire citation needed

shape memory alloy sma actuators the role of material - Aug 04 2022

web apr 19 2023 recently a novel microscale shape memory actuator has been developed for microrobotic applications creating a strain in the oxidized layer that causes bending motion by electric energy 183 also 30 nm thin ferroelectric ferromagnetic ceramic composites exhibit shape memory behavior 184

shape memory alloys properties and applications a review - Nov 07 2022

web may 22 2023 shape memory alloys smas are materials that both industry and research are interested in smas are materials that after a seemingly irreversible deformation can return to their original

shape memory alloys in automotive industry overview application - Oct 06 2022

web oct 8 2020 shape memory alloys sma are widely known as smart materials used as actuators in many engineering systems sma are known as very thermo sensitive materials which have different responses

the current status of industrial applications for shape memory alloys - Jun 02 2022

web jan 1 1994 after three decades of research and product design shape memory alloy technology is now maturing and a broad variety of consumer and industrial products have been developed these products are reviewed and the interesting applications in the field of medicine are discussed
