Manuals Combined: AMPHIBIOUS WARFARE & NAVAL SCIENCE FOR THE MERCHANT MARINE OFFICER , AMPHIBIOUS WARFARE LETTER OF PROMULGATION This curriculum guide builds upon the work of many contributors Intellectual rigor and academic standards demand that the full scope of amphibious

warfare be encompassed rather than the tracing of Marine Corps History emphasizing the landings of the Great Pacific War which had forged our modern Corps The present course structure and content reflect the determination that 1 the history of amphibious warfare remains a valid intellectual endeavor 2 its scope greatly exceeds the study of the U S Marine Corps and 3 a historical survey of amphibious warfare is best approached from a Maneuver Warfare perspective exploring the various levels of war and their impact on each battle The levels of war would include the political strategic operational and tactical technical This construct of classes will also prepare students to become critical thinkers of warfare and thus better prepare them for future commissioned service to the Marine Corps Instructors are cautioned to observe that this manual contains lesson guides not lesson plans Instructors must devote time for serious background reading in recommended literature course texts and contemplation of a conceptual approach that will capture the imagination of their students Another important objective of this course must be to stimulate original thought and persistent interest on the part of the student

PROFESSIONAL CORE COMPETENCY OBJECTIVES The primary objectives of this course are to provide prospective merchant marine officers a basic understanding of their role in our national security and to familiarize them with the basic principles and procedures for operating a merchant ship as a naval or military auxiliary in a wartime convoy or independent sailing situation
