2 **Metals in Food**

4 **Introduction**

6 The application of analytical methods within a regulatory analysis or accredited
7 laboratory framework imposes certain requirements on both the analyst and laboratory. Under
8 ISO/IEC 17025, accredited laboratories are expected to demonstrate both "fitness for purpose" of the
9 methods for which they are accredited and competency of their assigned analysts in performance
10 of the methods¹. The Codex Alimentarius Commission has issued a general guideline for
11 analytical laboratories involved in the import and export testing of foods which contains four
12 principles²:

- 14 • Such laboratories should demonstrate internal quality control procedures which meet the
15 requirements of the Harmonised Guidelines for Internal Quality Control in Analytical
16 Chemistry³;
- 17 • Such laboratories should be regular participants in appropriate proficiency testing schemes
18 which have been designed and conducted as per the requirements of the International
19 Harmonized Protocol for Proficiency Testing of (Chemical) Analytical Laboratories⁴;
- 20 • Such laboratories should become accredited for tests routinely performed according to
21 ISO/IEC 17025:1999 General requirements for the competence of calibration and testing
22 laboratories (now ISO/IEC 17025⁵); and
- 23 • Such laboratories should use methods which have been validated according to the principles
24 laid down by the Codex Alimentarius Commission whenever such methods are available.

26 General requirements for validation of analytical methods according to principles laid
27 down by the Codex Alimentarius Commission are provided in the Codex Manual of Procedures,
28 including provision for "single laboratory" validation of analytical methods⁶. However, there
29 remains considerable misunderstanding among analysts as to precisely what is meant and what is
30 required to demonstrate "method validation". Additional guidance for possible future inclusion
31 in the Manual of Procedures is currently under discussion in the Codex Committee on Methods
