

Android User Guide

1 Overview

This document explains how to use the Android release package.

It describes how to setup the environment, how to apply LMX Android patches, and how to build the Android system. It also describes how to download built out images into storage device and setup the correct hardware/software boot configurations to boot up the system. Meanwhile, it provides the information on how to get Android source from Google, and what the device storage usage and boot option is. Please see <http://source.android.com/source/building.html>.

2 PC Setup

To build the Android source files, you will need to use Linux PC.

You also need to use the 11.04 64bit version of Ubuntu which is the most tested OS for the Android 4.0.4 build.

After installing the Linux PC, you need to check whether you have all the necessary packages installed for an Android build. Refer to "Setting up your machine" on the Android web site <http://source.android.com/source/initializing.html>.
