Handbook of BRICS and Emerging Economies P. B. Anand,Shailaja Fennell,Flavio Comim,2021 Ever since Jim O Neill at Goldman Sachs coined the term BRICS in 2001 there have been many different assessments of these major emerging economies with some even proclaiming that the promise of the BRICS comprising Brazil Russia India China and South Africa is over However the so called arranged marriage still seems to be working well with the club having become a formal international forum with summit declarations ministerial meetings and numerous BRICS wide fora Is this euphoria misplaced Is there a BRICS model of economic and human development Are inequalities increasing and is this the denouncement of the economic successes The Handbook of BRICS and Emerging Economies presents a comprehensive and multi faceted analysis of the BRICS countries and other emerging economies exploring their economic social environmental and governance dimensions and

other challenges It brings together multi disciplinary perspectives from more than fifty authors to examine how education contributed to the emergence of BRICS how BRICS are impacting African economies and how other emerging economies including Chile Mexico Turkey and others in Africa and Central Asia compare It observes the impact of governance challenges both within individual countries and in the forum for co operation amongst them what issues related to gender and identity based violence are prevalent and what the security implications are and the role of BRICS is in contributing to peace keeping operations *The Oxford Handbook of Africa and Economics* Célestin Monga,Justin Yifu Lin,2015-07-02 For a long time economic research on Africa was not seen as a profitable venture intellectually or professionally few researchers in top ranked institutions around the world chose to become experts in the field This was understandable the reputation of Africa centered economic research was not enhanced by the well known limitations of economic data across the continent Moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the Great Recession Times have changed many leading researchers including a few Nobel laureates have taken the subject of Africa and economics seriously enough to devote their expertise and creativity to it They have been amply rewarded the richness complexities and subtleties of African societies civilizations rationalities and ways of living have helped renew the humanities and the social sciences and economics in particular to the point that the continent has become the next major intellectual frontier to researchers from around the world In collecting some of the most authoritative statements about the science of economics and its concepts in the African context this handbook the first of two volumes opens up the diverse acuity of commentary on exciting topics and in the process challenges and stimulates the quest for knowledge Wide ranging in its scope themes language and approaches this volume explores examines and assesses economic thinking on Africa and Africa s contribution to the discipline The editors bring a set of powerful resources to this endeavor most notably a team of internationally renowned economists whose diverse viewpoints are complemented by the perspectives of philosophers political scientists and anthropologists

The African Affairs Reader Nic Cheeseman,Lindsay Whitfield,Carl Death,2017-05-19 African Affairs is the top journal in African Studies and has been for some time This book draws together some of the most influential important and thought provoking articles published in its pages over the last decade In doing so it collates essential cutting edge research on Africa and makes it easily available for students teachers and researchers alike The African Affairs Reader is broken down into four sections that cover some of the biggest themes and questions facing the continent today including the African State the Political Economy of Development Africa s Relationship with the World and Elections Representation Democracy Within each section articles deal with some of the most significant recent trends and events such as the prospects for democratization in Ghana and Nigeria the factors underpinning Rwanda s economic success the rise of political corruption in South Africa the spread of the drugs trade the struggle against gender based violence and the growing influence of China Each section is introduced by a new purpose written essay by the journal s editors that explains the evolution of the wider debate highlights key contributions and suggests new ways in which the discussion can be taken forward Taken together the essays and articles included in the volume provide both a coherent introduction to the study of Africa and a compelling commentary on the current state of play on the continent *Working with the Grain* Brian Levy,2014 This book directs attention away from unattainable good governance and towards with the grain institutional reforms that can initiate and sustain development momentum It shows how to find a good fit between country context and governance reform with virtuous circles of change sometimes transforming seemingly modest reforms into a cascading sequence of gains *A Fraught Embrace* Ann Swidler,Susan Cotts Watkins,2017-03-07 The complex relationships between altruists beneficiaries and brokers in the global effort to fight AIDS in Africa In the wake of the AIDS pandemic legions of organizations and compassionate individuals

descended on Africa from faraway places to offer their help and save lives A Fraught Embrace shows how the dreams of these altruists became entangled with complex institutional and human relationships Ann Swidler and Susan Cotts Watkins vividly describe the often mismatched expectations and fantasies of those who seek to help of the villagers who desperately seek help and of the brokers on whom both Western altruists and impoverished villagers must rely Based on years of fieldwork in the heavily AIDS affected country of Malawi this powerful book digs into the sprawling AIDS enterprise and unravels the paradoxes of AIDS policy and practice All who want to do good from idealistic volunteers to world weary development professionals depend on brokers as guides fixers and cultural translators These irreplaceable but frequently unseen local middlemen are the human connection between altruists dreams and the realities of global philanthropy The mutual misunderstandings among donors brokers and villagers each with their own desires and moral imaginations create all the drama of a romance longing exhilaration disappointment heartache and sometimes an enduring connection Personal stories public scandals and intersecting sometimes clashing fantasies bring the lofty intentions of AIDS altruism firmly down to earth Swidler and Watkins ultimately argue that altruists could accomplish more good not by seeking to transform African lives but by helping Africans achieve their own goals A Fraught Embrace unveils the tangled relations of those involved in the collective struggle to contain an epidemic *The Oxford Handbook of Nigerian Politics* A. Carl LeVan, Patrick Ukata, 2018

This volume is an authoritative and agenda setting examination of Nigerian politics **Housing in the Aftermath of the Fast Track Land Reform Programme in Zimbabwe** Lovemore Chipungu, Hangwelani Hope Magidimisha, 2020-12-10 This book delves into the Fast Track Land Reform Programme FTLRP in Zimbabwe to provide insight into how it facilitated the delivery of housing for low income urban households It highlights the politics of land reforms and the power of community engagement in housing development in urban areas Prior to the FTLRP the Zimbabwean governments had never embraced popular modes of housing production as key factors in urban development In the area of low income housing informal housing schemes have always been treated with apathy and indifference This left the conventional mode of housing production to be the only legitimate means to house low income households despite its shortcomings However the onset of the FTLRP in 2000 resulted in homeless urban households grasping the opportunity to invade farms for housing development Through the lenses of Marxism and Neoliberalism this book analyses housing schemes that emerged and the overall impact of the FTLRP on housing and land delivery in Harare This analysis is based on empirical evidence obtained from key informants and household surveys conducted in Harare The authors argue that the FTLRP provided a platform for innovativeness by households supported by the unpronounced national urban vision and prowess of the political leadership Hence the success of these housing schemes can be measured by acquisition of land which guarantees households access to the city However some of these housing schemes pose challenges key among them being lack of infrastructure The book concludes by presenting a new model for effective delivery of land and housing for the urban poor This is envisaged as a

useful policy tool for urban planners housing experts land economists urban and regional geographers as well as sociologists political scientists and social workers engaged in public administration of land and housing

World Development Report 2015 World Bank, 2014-12-04 Development economics and policy are due for a redesign In the past few decades research from across the natural and social sciences has provided stunning insight into the way people think and make decisions Whereas the first generation of development policy was based on the assumption that humans make decisions deliberatively and independently and on the basis of consistent and self interested preferences recent research shows that decision making rarely proceeds this way People think automatically when deciding they usually draw on what comes to mind effortlessly People also think socially social norms guide much of behavior and many people prefer to cooperate as long as others are doing their share And people think with mental models what they perceive and how they interpret it depend on concepts and worldviews drawn from their societies and from shared histories The *World Development Report 2015* offers a concrete look at how these insights apply to development policy It shows how a richer view of human behavior can help achieve development goals in many areas including early childhood development household finance productivity health and climate change It also shows how a more subtle view of human behavior provides new tools for interventions Making even minor adjustments to a decision making context designing interventions based on an understanding of social preferences and exposing individuals to new experiences and ways of thinking may enable people to improve their lives The Report opens exciting new avenues for development work It shows that poverty is not simply a state of material deprivation but also a tax on cognitive resources that affects the quality of decision making It emphasizes that all humans including experts and policy makers are subject to psychological and social influences on thinking and that development organizations could benefit from procedures to improve their own deliberations and decision making It

demonstrates the need for more discovery learning and adaptation in policy design and implementation The new approach to development economics has immense promise Its scope of application is vast This Report introduces an important new agenda for the development community
