*Guidelines for Process Safety in Bioprocess Manufacturing Facilities* CCPS (Center for Chemical Process Safety), 2011-12-28 This book helps advance process safety in a key area of interest. Currently, no literature exists which is solely dedicated to process safety for the bioprocessing industry. There are texts, guidelines, and standards on biosafety at the laboratory level and for industrial hygiene, but no guidelines for large-scale production facilities. In fact, biosafety is largely defined as a field that promotes safe laboratory practices, procedures, and use of containment equipment and facilities. Additionally, biomedical engineers, biologists, or other professionals without chemical engineering training or knowledge of inherently safe design are designing many of these facilities.

**Guidelines for Process Safety in Outsourced Manufacturing Operations** CCPS (Center for Chemical Process Safety), 2010-08-27 In today's competitive economy, companies often augment in-house production by outsourcing chemical reaction processes and distillation, drying, formulating, blending, and packaging operations. While most of these tolling or contracted manufacturing services proceed without incident, recent major accidents have pointed to weaknesses in some tolling arrangements such as reactivity of materials and processes. This Guidelines book provides the reader with proven procedures to improve process safety throughout the life cycle of a contracted manufacturing operation. Extensive checklists and examples used throughout the book make it a valuable learning tool and reference for companies conducting toll manufacturing or considering outsourcing manufacturing.
