Water Conservation Stephen T. Cockerham, Bernd Leinauer, 2011-01-01 Water is an increasingly valuable and limited resource often perceived as being wasted on turfgrass. This much anticipated second edition brings clear, current, science-based information on turfgrass management and water conservation to turf managers and researchers alike. Inside you will find a look at the current understanding of water use as well as new technologies being researched to reduce water use by turfgrass. Attention is paid to water quality and turfgrass as a key part of the urban environment; how integrating turfgrass with other landscape uses of water can be part of a conservation plan; and how various water qualities including reclaimed water can be part of a management plan. Chapters also cover advances in drought, heat, and salinity stress tolerance; the role of water in modified root zone media and native soils; water management technologies; considerations for construction and management of urban green spaces including parks and golf courses; water depletion; pesticide and nutrient runoff. A chapter summarizing the practical application of the science in each chapter rounds out the text, presenting the information in an immediately useable format. Includes 10 tables and figures, 20 color photos, a U.S. customary to metric conversion table, and an 8 page glossary.

Turfgrass Physiology and Ecology Gregory E. Bell, 2011-01-01 In order to face new challenges and unique situations in turfgrass management, students need to understand why specific management practices work and how to adjust them based on plants' requirements. Explaining the physiological needs of turfgrass plants, this advanced textbook outlines the management techniques that help supply those needs. Chapters discuss a range of practices and methods to cope with stress under both normal and less than optimum conditions, providing the decision making tools for improvement based on changing environmental conditions. This book presents a unique perspective of both science and practical management principles that will be applicable to all turfgrass sectors.
