Regulating Utilities and Promoting Competition Colin Robinson,2006-01-01 a treasure trove of valuable insight and commentary into the utility markets and how they are and should be regulated European Competition Law Review Regulating Utilities and Promoting Competition continues the series of annual books published in association with the Institute of Economic Affairs and the London Business School which critically review the state of utility regulation and competition policy With contributions by some of the leading figures in the field this important new book presents incisive chapters on a number of prominent topics These include amongst others the future of the railways the international trade in gas the economics and politics of wind power and the role of economics in merger reviews A key feature of the book is the careful examination of fundamental issues not only from the viewpoint of academic and other independent commentators but also by the regulators and heads of competition authorities themselves By addressing significant developments both in Britain and abroad the authors draw important lessons about the policy changes needed as well as their subsequent implementation This book will be of great value to practitioners policymakers and academics alike who are concerned with regulation deregulation and policies to promote competition

Reference Architecture for the Telecommunications Industry Christian Czarnecki,Christian Dietze,2017-01-26 This book reflects the tremendous changes in the telecommunications industry in the course of the past few decades shorter innovation cycles stiffer competition and new communication products It analyzes the transformation of processes applications and network technologies that are now expected to take place under enormous time pressure The International Telecommunication Union ITU and the TM Forum have provided reference solutions that are broadly recognized and used throughout the value chain of the telecommunications industry and which can be considered the de facto standard The book describes how these reference solutions can be used in a practical context it presents the latest insights into their development highlights lessons learned from numerous international projects and combines them with well founded research results in enterprise architecture

management and reference modeling The complete architectural transformation is explained from the planning and set up stage to the implementation Featuring a wealth of examples and illustrations the book offers a valuable resource for telecommunication professionals enterprise architects and project managers alike

Research Handbook on EU Media Law and Policy Parcu, Pier L., Brogi, Elda, 2021-09-21 This cutting edge Research Handbook presents a comprehensive overview of the European Union's influence on the regulation of the media sector in the digital age It explores and compares several areas of European legislation that have an impact on the media sector defined in a broad sense for its capacity to influence the public opinion at large

The Regionalisation of Competition Law and Policy within the ASEAN Economic Community Burton Ong, 2018-03-01 This edited volume of essays examines a wide range of issues related to the regionalisation of competition policy in South East Asia where the ten member states of ASEAN have launched the ASEAN Economic Community AEC Written by a diverse group of academics practitioners and policy makers this book explores issues such as the role of competition policy in facilitating the market integration ambitions of the ASEAN member states the challenges arising from divergences in the national competition law regimes of the ASEAN member states and the absence of a supranational legal framework and the future of competition policy in light of the AEC Blueprint 2025 Given the nexus between regional competition policy and regional market integration this book will be of particular interest to lawyers economists and policymakers working in the fields of competition law and regional trade law

International Handbook of Network Industries Matthias Finger, R. W. Kneke, 2011 To learn about how economic and institutional forces have shaped the network industries and policies towards them read the first part of the book To discover their impacts on particular industries read the second part And to find out what has happened in particular countries read the third part I think anyone interested in network industries should read all of it The book's structure allows for many interesting comparisons across countries and sectors Richard Green University of Birmingham UK This is a very useful and comprehensive guide to reforms in network industries in communications energy transport and water It is organized by generic topic sector and region Its authors are acknowledged experts I am confident that this Handbook will be a widely read and valuable resource for many years Martin Cave London School of Economics UK Quite an accomplishment this Handbook provides by far the most comprehensive overview of the role of the private sector and competition in infrastructure industries with thoughtful surveys of each of the major infrastructure sectors and of the key regions and countries Jos Gemez Ib ez Harvard University US In recent decades all infrastructures have undergone significant restructuring This worldwide phenomenon is often labelled liberalization and although expectations were high with respect to lower prices greater efficiency and innovation the expected gains have not always been fully realized This extensive state of the art Handbook provides a comprehensive overview of the various experiences of liberalization across different sectors regions and disciplines The multidisciplinary approach focuses on the economic political and institutional aspects of liberalization as well

as to a lesser extent on technological issues As such it constitutes a unique contribution as this broad overview is often lost in the sector specific country focused and purely disciplinary approaches prevalent in the current literature Sectors explored include telecoms the Internet energy and transport whilst the truly global perspective incorporates unique case studies from an array of developed and developing countries including the US China India and the EU The International Handbook of Network Industries will become the definitive volume for academics researchers and students of economics political science and law interested in infrastructure regulation It will also prove a valuable guide to practitioners and policy makers involved in liberalization and competition

Telecommunications Development in Asia John URE, 2008-05-01 No industry has expanded faster than telecommunications gained so many new users added so much value spread so rapidly to the underdeveloped areas of developing countries done so much to close the digital divide and provide access to e learning e health and e commerce across the countries of the Asia Pacific Telecommunications Development in Asia provides a completely new and comprehensive analysis of the policies adopted throughout the region that have led to the explosive growth of this sector It is a sequel to the 1995 landmark publication John Ure editor Telecommunications in Asia Policy Planning and Development and like the earlier volume will become a popular and indispensable guide for professionals policy makers and regulators working in telecommunications related sectors Part One of this new book is thematic It reviews global best practices across a range of key issues facing the industry from regulation competition policy and the provision of universal service to interconnection between competing networks the management of radio spectrum for the all important wireless communications sector and an assessment of innovation in the telecommunications equipment market Part Two examines markets across the Asia Pacific region exploring the themes of Part One through in depth country studies Policy and regulations industry trends and markets are uniquely placed in their historical economic and political context No other publication offers such comprehensive insights and understanding of the dynamic of these markets And like the 1995 book this one looks likely to stand the test of time

The Privatisation of European Telecommunications Johan From, Kjell A. Eliassen, 2017-11-28 This international volume presents a comprehensive comparative study of the transformation of the European telecommunications industry from 1990 to the present The book focuses on the old incumbent operators and their dramatic change from state agencies to listed companies It analyzes the liberalization process as well as the corporatization and privatization of these companies The contributors assess the conditions for the transformations taking place the driving forces for change the effects to management the efforts of the EU during these processes and ultimately the role of the private owner Political science publications have all but excluded analysis of the newly privatized companies their contribution to the liberalization process both before and after privatization and the interplay between the national political and company levels The book redresses this shortcoming and also features a double empirical focus in that the main national incumbents in Europe are analyzed and compared to Telenor the Norwegian former incumbent

Digitalization in Open Economies Michael Vogelsang,2010-03-20 Digital strings are not visible but affect all economic segments This book studies the phenomenon of digitalization with the instruments of economics in order to explore the interdependencies between digitalization economic policy and macroeconomic variables of open economies Digitalization is separated into the three components networks IT services and digital goods which are then incorporated into macroeconomic models of trade theory in open economies This approach allows to formally describe the cross effects between digitalization and macroeconomic variables of a country Specifically it is used to analyze interdependencies between macroeconomic variables and networks IT services and digital goods and to determine the challenges of digitalization for economic policy and regulation **The Liberalisation of the Telecommunications Sector in Sub-Saharan Africa and Fostering**

Competition in Telecommunications Services Markets Rachel Alemu,2018-02-02 This study investigates whether the existing regulatory framework governing the telecommunications sector in countries in Sub Saharan Africa effectively deals with emerging competition related concerns in the liberalised sector Using Uganda as a case study it analyses the relevant provisions of the law governing competition in the telecommunications sector and presents three key findings Firstly while there is comprehensive legislation on interconnection and spectrum management inefficient enforcement of the legislation has perpetuated concerns surrounding spectrum scarcity and interconnection Secondly the legislative framework governing anti competitive behaviour though in line with the established principles of competition law is not sufficient Specifically the framework is not equipped to govern the conduct of multinational telecommunications groups that have a strong presence in the telecommunications sector Major factors hampering efficient competition regulation include Uganda s sole reliance on sector specific competition rules restricted available remedies and a regulator with limited experience of enforcing competition legislation The weaknesses in the framework strongly suggest the need to adopt an economy wide competition law Lastly wireless technology is the main means through which the population in Uganda accesses telecommunications services Greater emphasis should be placed on regulating conduct in the wireless communications markets Cellular

Cellular Daniel D. Garcia-Swartz,Martin Campbell-Kelly,2022-10-18 Tracks the evolution of the international cellular industry from the late 1970s to the present The development of the mobile phone industry into what we know today required remarkable cooperation between companies governments and industrial sectors Companies developing cellular infrastructure cellular devices cellular network services and eventually software and mobile semiconductors had to cooperate not simply compete with each other In this global history of the mobile phone industry Daniel D Garcia Swartz and Martin Campbell Kelly examine its development in the United States Europe Japan and several emerging economies including China and India They

present the evolution of mobile phones from the perspective of vendors of telephone equipment and network operators users whose lives have been transformed by mobile phones and governments that have fostered specific mobile phone standards Cellular covers the technical aspects of the cellphone as well as its social and political impact Beginning with the 1980s the authors trace the development of closed proprietary and open available to all cellular standards the impact of network effects as cellular adoption increased major technological changes affecting mobile phone hardware and the role of national governments in shaping the industry The authors also consider the changing roles that cellular phones have played in the everyday lives of people around the world and the implications 5G technology may have for the future Finally they offer statistics on how quickly the cellular industry grew in different regions of the world and how firms competed in those various markets Cellular is published in the History of Computing Series This distinguished series has played a major role in defining scholarship in the history of computing Hallmarks of the series are its technical detail and interpretation of primary source materials
