Handbook On Climate Change And Human Security:

Handbook on Climate Change and Human Security Michael R Redclift, Marco Grasso, 2013-10-31 The Handbook is international in scope and provides an assessment that will be of value to academics students and policy professionals alike NGOs and policy institutes which need a grasp of the specificity and range of the issues and problems will all Handbook on Climate Change and International Security Maria J. Trombetta, 2023-12-11 This topical Handbook explores the emergence of climate change as an international security issue the threats it poses and the political and academic debates it has prompted Framing climate change as a security issue it explores the ways relevant actors states and international organizations have conceptualized climate security and its associated threats **Climate Change, Disaster Risks, and Human Security** Juan M. Pulhin, Makoto Inoue, Rajib Shaw, 2021-03-18 This book explores how climate change and disaster risks threaten human security in Asia Climate change and disaster risks have emerged as major human security challenges in the twenty first century and are an imminent threat multiplier with the potential to harm the vital core of human life and curtail people's freedom and ability to live with dignity Climate change and disaster risks undermine the security of individuals communities nations and the world considering the increasing trend in the frequency and magnitude of hydro meteorological disasters and the projections on their future adverse impacts Despite recent advances in the literature there is still a major gap in understanding the relationship and linkages between climate change disaster risks and human security particularly as gleaned from the Asian experience Asia is the world's most vulnerable region in terms of the quantity and magnitude of impacts from various forms of disaster At the same time it has developed a number of innovative responses to address those risks offering a wealth of experience Exploring and capitalizing on the Asian perspective this book provides valuable resource material for students academics researchers policymakers and development practitioners working in these areas Sustainability, Capabilities and Human Security Andrew Crabtree, 2020-02-28 Amartya Sen and Martha Nussbaum have made major contributions to development studies and social philosophy yet sustainability issues have largely remained outside their domain despite sustainability's significance and complex relation to their central value of freedom This volume explores sustainability from a capabilities perspective with the motif of human security inviting a lively discussion within the human development family After introducing the two approaches authors conceptualize relationships between capabilities and the environment examine the scientific and normative validity of environmental indicators and analyse intergenerational justice Climate change is used to exemplify that a human security approach can add an explanatory ontology to the ethical criticisms of contemporary ways of life that champion consumerism That ontology recognizes shared life experiences problems and life challenges a community of fate The volume ends with a discussion of how the approaches can inform and sometimes critique the Sustainable Development Goals **Global Pandemic and Human Security** Rajib Shaw, Anjula Gurtoo, 2022-03-01 This book highlights how the human security aspect has been affected by the global pandemic based on

the specific case study field data and evidence COVID 19 has exemplified that the pandemic is global but its responses are local. The responses depend on national governance and policy framework use of technology and innovation and people's perceptions and behavior among many others. There are many differences in how the pandemic has affected the rich and the poor, urban and rural sectors, development and fiscal sectors, and developed and developing nations and communities. Echoing human security principles, the 2030 Agenda emphasized a world free of poverty, hunger, disease, and want, free of fear and violence, with equitable and universal access to quality education, health care, and social protection, to safe drinking water and sanitation, where food is sufficient, safe, affordable, and nutritious, where habitats are safe, resilient, and sustainable, and where there is universal access to affordable, reliable, and sustainable energy. These basic human security PA1 principles and development agenda are highly affected by the global pandemic worldwide, irrespective of its development and economic status. Thus, the book highlights the nexus between human security and development issues. It has two major pillars: one is the development and the other is technology issues. These two interdependent topics are discussed in the perspective of the global pandemic, making this the most important feature of this book. While the world is still in the middle of a pandemic and possibly other natural and biological hazards may affect people's lives and livelihoods in the future, this book provides some key learning which can be used to cope with future uncertainties, including climate risks. Thus, the book is timely and relevant to wider readers.

Global Environmental Change and Human Security Richard A. Matthew, Jon Barnett, Bryan McDonald, Karen L. O'Brien, 2009-10-09. Experts discuss the risks global environmental change poses for the human security, including disaster and disease, violence, and increasing inequity. In recent years, scholars in international relations and other fields have begun to conceive of security more broadly, moving away from a state-centered concept of national security toward the idea of human security, which emphasizes the individual and human well-being. Viewing global environmental change through the lens of human security connects such problems as melting ice caps and carbon emissions to poverty, vulnerability, equity, and conflict. This book examines the complex social, health, and economic consequences of environmental change across the globe. In chapters that are both academically rigorous and policy relevant, the book discusses the connections of global environmental change to urban poverty, natural disasters, with a case study of Hurricane Katrina, violent conflict, with a study of the decade-long Nepalese civil war, population, gender, and development. The book makes clear the inadequacy of traditional understandings of security and shows how global environmental change is raising new, unavoidable questions of human insecurity, conflict, cooperation, and sustainable development. Handbook of Security and the Environment Ashok Swain, Joakim Öjendal, Anders Jägerskog, 2021-05-28. This comprehensive Handbook tackles the

increasingly urgent problem of the impact of climate change on conflict and human security It analyses the ways in which scarcity of resources leads to food water and health insecurities resulting in population migration Featuring contributions from leading international scholars chapters cover how these contribute globally to societal insecurity and violent conflict in a growing number of regions

Environmental Change and Human Security in Africa and the Middle East Mohamed Behnassi, Katriona McGlade, 2017-01-17 This volume brings together insights on the interactions between environmental change and human security in the Middle East and Africa These regions face particular challenges in relation to environmental degradation the decline of natural resources and consequent risks to current and future human security The chapters provide topical analysis from a range of disciplines on the theory discourse policy and practice of responding to global environmental change and threats to human security Case studies from Morocco Tunisia Egypt Turkey Iraq and Syria provide empirical evidence with a focus section dedicated to the critical issue of water resources and water security in the region The contributions demonstrate above all that the risks posed to human security arise through multiple and interconnected processes operating across diverse spatial and temporal scales The complexity of these processes requires new ways of thinking and intervening As a contribution the current volume provides engaging insights from theory and practice for those seeking to address the challenges of environmental change

Society, Environment and Human Security in the Arctic Barents Region Kamrul Hossain, Dorothee Cambou, 2018-05-20 The Arctic Barents Region is facing numerous pressures from a variety of sources including the effect of environmental changes and extractive industrial developments The threats arising out of these pressures result in human security challenges This book analyses the formation and promotion of societal security within the context of the Arctic Barents Region It applies the human security framework which has increasingly gained currency at the UN level since 1994 UNDP as a tool to provide answers to many questions that face the Barents population today The study explores human security dimensions such as environmental security economic security health food water energy communities political security and digital security in order to assess the current challenges that the Barents population experiences today or may encounter in the future In doing so the book develops a comprehensive analysis of vulnerabilities challenges and needs in the Barents Region and provides recommendations for new strategies to tackle insecurity and improve the wellbeing of both indigenous and local communities This book will be a valuable tool for academics policy makers and students interested in environmental and human security sustainable development environmental studies and the Arctic and Barents Region in particular

Climate Change, Human Security and Violent Conflict Jürgen Scheffran, Michael Brzoska, Hans Günter Brauch, Peter Michael Link, Janpeter Schilling, 2012-05-26 Severe droughts damaging floods and mass migration Climate change is becoming a focal point for security and conflict research and a challenge for the world's governance structures But how severe are the security risks and conflict potentials of climate change Could global warming trigger a sequence of events leading to economic decline

social unrest and political instability What are the causal relationships between resource scarcity and violent conflict This book brings together international experts to explore these questions using in depth case studies from around the world Furthermore the authors discuss strategies institutions and cooperative approaches to stabilize the climate society interaction *Blurring Boundaries: Human Security and Forced Migration* Stefan Salomon, Lisa Heschl, Gerd Oberleitner, Wolfgang Benedek, 2017-06-12 In *Blurring Boundaries Human Security and Forced Migration* scholars from law and social sciences offer a fresh view on the major issues of forced migration through the lens of human security Although much scholarship engages with forced migration and human security independently they have hardly been weaved together in a comprehensive manner The contributions cover the issues of refugee law maritime migration human smuggling and trafficking and environmental migration *Blurring Boundaries* critically engages boundaries produced in the law with the main ideas of human security thus providing a much needed novel vocabulary for a critical discourse in forced migration studies

Rethinking Climate Change, Conflict and Security Jan Selby, Clemens Hoffmann, 2017-10-02 Is global climate change likely to become a significant source of violent conflict and should it therefore be seen as a national security challenge Most Northern governments militaries think tanks and NGOs believe so as do many academic researchers on the grounds that increased temperatures changing precipitation patterns and rising sea levels will worsen existing social stresses especially within poor societies and marginal communities across Africa and Asia This book argues otherwise The first collection of its kind it brings together leading scholars of Anthropology Geography Development Studies and International Relations to provide a series of critical analyses of mainstream thinking on the climate security nexus It shows how policy discourse on climate conflict consistently misrepresents the causes of violence especially by obscuring its core political dimensions It demonstrates that quantitative research provides a flawed basis for understanding climate conflict linkages It argues that climate security discourse is in hoc with a range of questionable military authoritarian and developmental agendas And it reveals that the greening of global capitalism is already having violent consequences across the global South Climate change the book argues does indeed have serious conflict and security implications but these are quite different from how they are usually imagined This book was published as a special issue of *Geopolitics* **Human Security and Sustainable**

Development in East Africa Jeremiah O. Asaka, Alice A. Oluoko-Odingo, 2022-05-23 This book investigates contemporary human security issues in East Africa setting forth policy recommendations and a research agenda for future studies Human security takes a people centered rather than state centered approach to security issues focusing on whether people feel safe free from fear want and indignity This book investigates human security in East Africa encompassing issues as diverse as migration housing climate change displacement food security aflatoxins land rights and peace and conflict resolution In particular the book showcases innovative original research from African scholars based on the continent and abroad and together the contributors provide policy recommendations and set forth a human security research agenda for East Africa

which encompasses Kenya Uganda Tanzania Somalia Rwanda Burundi South Sudan Sudan Ethiopia Eritrea and Djibouti As well as being useful for policy makers and practitioners this book will interest researchers across African Studies Security Studies Environmental Studies Political Science Global Governance International Relations and Human Geography The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

The Concept of Climate Migration Benoît Mayer, 2016-11-25 This timely book offers a unique interdisciplinary inquiry into the prospects of different political narratives on climate migration It identifies the essential angles on climate migration the humanitarian narrative the migration narrative and the climate change narrative and assesses their prospects The author contends that although such arguments will influence global governance they will not necessarily achieve what advocates hope for He discusses how the weaknesses of the concept of climate migration are likely to be utilized in favour of repressive policies against migration or for the defence of industrial nations against perceived threats from the Third World

The Palgrave Encyclopedia of Global Security Studies, 2023-02-15 This encyclopedia provides an authoritative guide intended for students of all levels of studies offering multidisciplinary insight and analysis of over 500 headwords covering the main concepts of Security and Non traditional Security and their relation to other scholarly fields and aspects of real world issues in the contemporary geopolitical world

A Changing Environment for Human Security Linda Sygna, Karen O'Brien, Johanna Wolf, 2013-06-26 Environmental change presents a new context and new opportunities for transformational change This timely book will inspire new ways of understanding the relationship between environmental change and human security A Changing Environment for Human Security Transformative Approaches to Research Policy and Action both supports and informs a call for new transformative approaches to research policy and action The chapters in this book include critical analyses case studies and reflections on contemporary environmental and social challenges with a strong emphasis on those related to climate change Human thoughts and actions have contributed to an environment of insecurity manifested as multiple interacting threats that now represent a serious challenge to humanity Yet humans also have the capacity to collectively transform the economic political social and cultural systems and structures that perpetuate human insecurities These fresh perspectives on global environmental change from an interdisciplinary group of international experts will inspire readers whether students researchers policy makers or practitioners to think differently about environmental issues and sustainability The contributions show that in a changing environment human security is not only a possibility but a choice

Human Security and Empowerment in Asia Mely Caballero-Anthony, Yoichi Mine, Sachiko Ishikawa, 2023-10-26 In the context of the COVID 19 pandemic this edited volume revisits the framework of human security and development It examines the protection empowerment nexus as applied to various vulnerable groups and populations affected by the pandemic While the conventional human security literature has focused on top down protection this book offers new perspectives on human

security by exploring bottom up empowerment from both theoretical and practical perspectives It also encourages readers to rethink the agency of vulnerable people in addressing the challenges posed by the pandemic Through eight case studies from Southeast Asia and Japan the contributors to this book demonstrate the importance of empowerment in achieving human security They focus on the responses of vulnerable groups and communities to multiple threats to their lives livelihoods and dignity The chapters discuss key human security concerns such as poverty the environment food forced migration gender health aging peace and justice all of which have been compounded and exacerbated by the COVID 19 pandemic An essential resource for students and scholars of human security in the aftermath of COVID 19 and its wider impacts The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license Funded by JICA Ogata Sadako Research Institute for Peace and Development

Achieving Equity in Neurological Practice Bruce Ovbiagele, Sharon Lewis, Daniel José Correa, Reena Thomas, Larry Charleston IV, 2024-10-22 The recent high profile murders of George Floyd and other African American individuals along with the prevailing coronavirus disease COVID 19 pandemic have reinforced the notion that certain marginalized populations have worse health outcomes than other populations likely due to unequal and unjust policies and practices Neurological processes and prognoses frequently vary by sex gender race ethnicity socioeconomic status and geographic location In particular individuals of lower socioeconomic status and from minority racial and ethnic backgrounds have worse neurological health and often receive a lower standard of neurological care These inequities in neurological outcomes are attributed to wider societal social influences which impact how people live and how neurology is practiced Published evidence suggests that healthcare providers and the healthcare system contribute to inequities in neurological care for vulnerable and underserved populations However educating neurology care providers about these issues and training them to provide equitable care for these patients can potentially improve neurology care access delivery and outcomes In this book we provide the theoretical background scientific evidence and experiential knowledge warranted to properly care for vulnerable underserved patients with neurological diseases at the levels of the provider and system This book examines the root causes of neurological health inequities across a broad range of topics and offers possible solutions for achieving neurological health equity Initial chapters help to frame the overall issue of neurological health equity Subsequent chapters evaluate neurological health equity from the clinical practice standpoint with a focus on select populations and subspecialty care delivery settings Lastly we discuss the bigger picture with regard to the pipeline of practitioners and purview of policy makers This text is relevant for neurology residents and fellows multidisciplinary neurological care practitioners neurologists neurosurgeons advanced practice providers hospitalists emergency physicians critical care physicians pharmacists and allied health personnel and public health researchers and health policy makers The book is divided into three sections Principles Neurological Conditions and Priorities The first section establishes the

framework and explains various key terminologies and concepts which undergird the care of vulnerable and undeserved patient populations The second section Neurological Conditions covers key neurological diseases by sub specialty describing published evidence of care and outcome disparities gaps in knowledge practical techniques for bridging these disparities on provider and system levels The third section Priorities identifies important areas of focus and improvement targeting trainees researchers community partners stakeholder organizations and policy makers which would be crucial for implementing sustained societal level enhancements in the neurological health of these vulnerable populations Trust, Tourism

Development and Planning Robin Nunkoo, Stephen L.J. Smith, 2014-08-07 The dynamics of trust and distrust are central to understanding modern society social relations and development processes However numerous studies suggest that societal trust and citizen s trust in government and its institutions are on the decline challenging the legitimacy of government and leading to an undemocratic and unsustainable form of development Recognizing its importance the authors for the first time situate trust within the context of tourism development and planning This volume discusses trust in tourism from different yet intrinsically connected perspectives Chapters review how diminishing societal trust may have adversely affected tourism planning systems the role of trust in good tourism governance and sustainable tourism how trust can be used as a facilitator of participatory tourism planning political trust in tourism institutions power and how tourism development can be a basis for trust creation among society members by using social capital theory In addition a final section on Researching Trust in Tourism Development means that readers are not only provided a thorough theoretical framework on trust and an understanding of its importance for sustainable tourism and good governance of the sector but also methodological aspects of research on trust in the context of tourism development and planning This significant volume is valuable reading for students academics and researchers interested in tourism development and planning **The Oxford Handbook of**

Climate Change and Society John S. Dryzek, Richard B. Norgaard, David Schlosberg, 2011-08-18 Climate change presents perhaps the most profound challenge ever confronted by human society This volume is a definitive analysis drawing on the best thinking on questions of how climate change affects human systems and how societies can do and should respond Key topics covered include the history of the issues social and political reception of climate science the denial of that science by individuals and organized interests the nature of the social disruptions caused by climate change the economics of those disruptions and possible responses to them questions of human security and social justice obligations to future generations policy instruments for reducing greenhouse gas emissions and governance at local regional national international and global levels
