Education and Pedagogy / Educación y pedagogía Di Pietro, Giovanna, Broers, Nico, 2024-09-23 The motivation to dedicate a volume of the Conservation 360 series to education and pedagogy arose during the COVID years 2020 and 2021 when conservation restoration teachers were forced to suddenly change the format of their lessons. In Europe an informal and international group called AcCESS Academic Conservation Education Sharing Site was formed to share and support each other on how to teach online. It was soon realized that the challenges associated with the curriculum were larger and deeper than the shift from face to face to online format. It was also realized that the literature available both at the level of curriculum structure and at the level of classroom didactics was sparse and that teachers mostly relied on their experience as students' personal contacts with other teachers or general didactic publications not related to the field of conservation restoration. The present volume aims to fill this gap by collecting reflections and experiences on the evolution of the curriculum and its role in defining the profession and by tracing important changes in the education of conservators and restorers both in terms of the decolonization of the discipline and the role of curricula in addressing societal and environmental challenges such as climate change

Art Education James Hutchens, Marianne Stevens Suggs, 1997 This book examines the effect of postmodern discourse on the content and practice of art in the K-12 schools and university preservice education programs for art teachers. An education that references and places emphasis upon the economic, political, social and cultural factors inscribed upon the artworld. Art Education Roger Clark, 1996 Art Education in a Postmodern World, 2006 *Enseñar la cultura visual* Kerry Freedman, 2006 La cultura global está cambiando rápidamente de la comunicación basada en el texto a la saturación de imágenes. La cultura visual está en todas partes en la televisión en los museos en las revistas en los cines en Internet en los centros comerciales, etc. Como resultado, aprender sobre las complejidades de la cultura visual está convirtiéndose en algo cada vez más crucial para el desarrollo humano. Este es uno de los primeros libros que se centran en la enseñanza de la cultura visual. La autora proporciona la base teórica sobre la que desarrollar un currículum para una educación artística postmoderna. Freedman presenta los fundamentos de las teorías sociales cognitivas y curriculares que pueden servir de marco conceptual para enseñar artes visuales desde una perspectiva cultural
