La Maquina De Los Memes The Meme Machine Spanish Edition:

La máquina de los memes Susan Blackmore, 2000-11 Los humanos somos muy extraños De la misma forma en que lo hicieron los animales nuestros cuerpos han evolucionado por selección natural y no obstante son tremendamente distintos de los cuerpos de los otros seres Utilizamos el lenguaje para comunicarnos declaramos la guerra creemos en la religión enterramos a nuestros muertos y nos avergonzamos la sexualidad Consumimos televisión conducimos automóviles y comemos helados Por qué somos tan sumamente distintos De entre todos los animales los humanos somos los únicos seres capaces de imitar a nuestros semejantes y por lo tanto de copiar ideas costumbres habilidades conducta inventos canciones e historias memes en suma El término meme fue acuñado en 1976 por Richard Dawkins en las últimas páginas de su obra El gen egoísta Los memes como los genes son replicantes empeñados en introducirse en tantos cerebros como puedan y en iniciar una competición que da forma a nuestras mentes y a nuestra cultura del mismo modo en que la selección natural ha diseñado nuestros cuerpos Los memes nos hacen todos los seres humanos somos máquinas de fabricar memes Este fascinante y extraordinario libro concluye con una de las cuestiones más trascendentales con las que debe enfrentarse el ser humano la naturaleza del ser el meollo de la conciencia que siente emociones que tiene recuerdos y creencias y que toma decisiones Y así el fascinante discurso de Susan Blackmore sostiene que ese meollo de la conciencia el yo interior no es más que una entelequia una ilusión creada por los memes en su esfuerzo por autorreplicarse **Obra completa** Yuval Noah

The Meme Machine Susan J. Blackmore, 1999 Memes are ideas behaviours or skills that are transferred from one person to another by imitation The term was coined by Richard Dawkins in his bestselling The Selfish Gene OUP 1976 in which he described how biological design arises as genes compete selfishly to replicate themselves In his final chapter Dawkins suggested that memes are also replicators and that they compete to get themselves copied into as many brians as possible Examples include tunes catch phrases clothes fashions and new ways of building arches If memes are true replicators then our minds are fashioned by memes just as our bodies are fashioned by genes After twenty years the word meme is to be included in the next edition of the Oxford English Dictionary However most academics avoid the word and a true science of memetics has not yet developed This book will lay the foundations for such a science starting with a clear definition of the meme and applying the principles of general evolutionary theory to understanding memetic selection This approach provides new theories of memetic altruism the development of language and the origins of the enormous human brain
