Language Put to Work Enda Brophy, 2017-08-11 WINNER of The Gertrude J Robinson Book Prize awarded by the Canadian Communication Association and the Canadian Association of Work and Labour Studies Book of the Year Award This book examines the striking rise of call centres over the past quarter century through the lens of the resistance and collective organizing generated by workers along the digital assembly lines Drawing on field

research in Atlantic Canada Ireland Italy and New Zealand Enda Brophy investigates the contested making of the transnational call centre workforce and its integration into the circuits of global capitalism Moving beyond depictions of call centre labour as either entirely liberated or utterly subordinated Language Put to Work inquires into the forms of work refusal and insubordination provoked by the spread of these communicative workplaces including informal strategies of quitting slacking and sabotage conventional trade union activity tactical innovations at the margins of the labour movement and forms of self organization forged by workers outside of the established trade union movement Weaving rich empirical evidence together with political economic analysis and theories of resistance this book argues that the submission of language to the production of value in the call centre is a process of proletarianization rather than professionalization and that the new working class has widely opposed this transformation

The Gig Academy Adrianna Kezar, Tom DePaola, Daniel T. Scott, 2019-10-29 Why the Gig Academy is the dominant organizational form within the higher education economy and its troubling implications for faculty students and the future of college education Over the past two decades higher education employment has undergone a radical transformation with faculty becoming contingent staff being outsourced and postdocs and graduate students becoming a larger share of the workforce For example the faculty has shifted from one composed mostly of tenure track full time employees to one made up of contingent part time teachers Non tenure track instructors now make up 70 percent of college faculty Their pay for teaching eight courses averages 22 400 a year less than the annual salary of most fast food workers In The Gig Academy Adrianna Kezar Tom DePaola and Daniel T Scott assess the impact of this disturbing workforce development Providing an overarching framework that takes the concept of the gig economy and applies it to the university workforce this book scrutinizes labor restructuring across both academic and nonacademic spheres By synthesizing these employment trends the book reveals the magnitude of the problem for individual workers across all institutional types and job categories while illustrating the damaging effects of these changes on student outcomes campus community and institutional effectiveness A pointed critique of contemporary neoliberalism the book also includes an analysis of the growing divide between employees and administrators The authors conclude by examining the strengthening state of unionization among university workers Advocating a collectivist action oriented vision for reversing the tide of exploitation Kezar DePaola and Scott urge readers to use the book as a tool to interrogate the state of working relations on their own campuses and fight for a system that is run democratically for the benefit of all Ultimately The Gig Academy is a call to arms one that encourages non tenure track faculty staff postdocs graduate students and administrative and tenure track allies to unite in a common struggle against the neoliberal Gig Academy

Ghost Work Mary L. Gray, Siddharth Suri, 2019 A startling exposé of the invisible human workforce that powers the web and how to bring it out of the shadows Hidden beneath the surface of the internet a new stark reality is looming one that cuts to the very heart of our endless debates about the impact of AI Anthropologist Mary L. Gray and computer scientist Siddharth Suri unveil how the services we use from companies like Amazon Google Microsoft and Uber can only function smoothly thanks to the judgment and experience of a vast human labor force that is kept deliberately concealed The people who do ghost work make the internet seem smart They perform high tech on demand piecework flagging X rated content proofreading transcribing audio confirming identities captioning video and much more The shameful truth is that no labor laws protect them or even acknowledge their existence They often earn less than legal minimums for traditional work they have no health benefits and they can be fired at any time for any reason or for no reason at all An estimated 8 percent of Americans have worked in this ghost economy and that number is growing every day In this unprecedented investigation Gray and Suri make the case that robots will never completely eliminate ghost work and the unchecked quest for artificial intelligence could spark catastrophic work conditions if not stopped in its tracks Ultimately they show how this essential type of work can create opportunity rather than misery for those who do it
