Pacific CRYSTAL Centre for Science, Mathematics, and Technology Literacy: Lessons Learned Larry D. Yore, Eileen Van der Flier-Keller, David W. Blades, Timothy W. Pelton, David B. Zandvliet, 2011-10-25 The University of Victoria Pacific Centre for Scientific and Technological Literacy is one of five Centres for Research into Youth Science Teaching and Learning CRYSTAL funded for 5 years 2005 2010 by the Natural Sciences and Engineering Research Council Canada NSERC Pacific CRYSTAL intended to promote scientific mathematical and technological literacy for responsible citizenship through research partnerships with university and educational communities Pacific CRYSTAL's functional structure consisted of 3 research and development nodes connected to a leadership and administrative node which was charged with facilitating the activities of 19 projects and 42 principal investigators partners and research associates Node 1 an incubation centre involved extracurricular authentic science mathematics and technology experiences Node 2 a classroom testing environment field tested instructional ideas and strategies to develop evidence based practices and Node 3 lighthouse schools involved systemic change and leadership opportunities that adapted demonstrated and disseminated tested ideas resources and strategies to a much broader education community and attempted to influence public policy This book provides descriptions of the target goals research and development projects and lessons learned *Mathematical Methods for Protein Structure Analysis and Design* Concettina Guerra, Sorin Istrail, 2003-06-25 The papers collected in this volume reproduce contributions by leading scholars to an international school and workshop which was organized and held with the goal of taking a snapshot of a discipline undergoing tumultuous growth Indeed the area of protein folding docking and alignment is developing in response to needs for a mix of heterogeneous expertise spanning biology chemistry mathematics computer science and statistics among others Some of the problems encountered in this area are not only important for the scientific challenges they pose but also for the opportunities they disclose in terms of medical and industrial exploitation A typical example is offered by protein drug interaction docking a problem posing daunting computational problems at the crossroads of geometry physics and chemistry and at the same time a problem with unimaginable implications for the pharmacopoeia of the future The school focused on problems posed by the study of the mechanisms hindering protein folding and explored different ways of attacking these problems under objective evaluations of the methods Together with a relatively small core of consolidated knowledge and tools important reactions were brought to this effort by studies in a multitude of directions and approaches It is obviously impossible to predict which if any among these techniques will prove completely successful but it is precisely the implicit dialectic among them that best conveys the current flavor of the field Such unique diversity and richness inspired the format of the meeting and also explains the slight departure of the present volume from the typical format in this series the exposition of the current sediment is complemented here by a selection of qualified specialized contributions *Empowering*
