*Handbook on Transport and Land Use* João de

Abreu e Silva, Veronique Van Acker, Kristina M. Currans, Robert J. Schneider, 2023-06-28 Synthesizing current understandings on the relationship between transport and land use this timely Handbook proposes an agenda for research and practice that leads toward more human centered communities within an increasingly urbanized world facing rapid technological change. Leading scholars reframe and expand conventional transport policy holistically with concepts grounded in behavioral, economic, psychological, and sociological theories in this fundamental reference work. Chapters explore the role of institutional policies and informal cultural contexts in influencing transport and land use systems before examining the impacts of transportation and land use decisions across multiple areas including equity, public health, climate, environment, and lifestyle preferences. The Handbook concludes by emphasizing pathways for human centered development planning and policy in an age of rapid innovation in new mobility technologies. Outlining the fundamental, emerging, and developing theories, methods, models, and policies across the fields of transportation and land use, this interdisciplinary Handbook will be invaluable to students and scholars of urban planning and transport studies. Setting an agenda for future research and policy initiatives, it will also prove a useful resource to policymakers and practitioners working within transport and land use planning.

[A Handbook of Transport Economics](#) André de Palma, Robin Lindsey, Emile Quinet, Roger Vickerman, 2011-01-01 This Handbook is a stellar compilation of up to date knowledge about the important topics in transport economics. Authors include the very best in the field and they cover the most important topics for today's research and policy applications. Individual chapters contain sound, readable, well referenced explanations of each topic's history and current status. I cannot think of a better place to start for anyone wanting to become current in the field or in any of its parts. Kenneth Small, University of California Irvine, US. Bringing together insights and perspectives from close to 70 of the world's leading experts in the field, this timely Handbook provides an up to date guide to the most recent and state of the art advances in transport economics. The comprehensive coverage includes topics such as the relationship between transport and the spatial economy, recent advances in travel demand analysis, the external costs of transport, investment appraisal, pricing, equity issues, competition and regulation, the role of public private partnerships, and the development of policy in local bus services, rail, air, and maritime transport. This Handbook is designed both for use on postgraduate and advanced undergraduate courses and as a reference for anyone working in the field. It also complements the textbook Principles of Transport Economics.

**Transport Development in Asian Megacities** Shigeru Morichi, Surya Raj Acharya, 2012-07-27 The rapid growth of the Asian urban population concentrates on a few large cities, turning them into giant megacities. Despite new theoretical insights into the benefits of megacities, the emerging Asia is facing a daunting challenge concerning the management of infrastructure and services in their megacities. The deteriorating urban mobility is the most difficult challenge with respect to the sharp increase in vehicle numbers and to inadequate and poorly managed road infrastructure. Public transport, a sustainable mode of mobility, is subjected to a vicious cycle of poor service, decreasing ridership, and lower investment. Despite

various policy initiatives the situation has not improved The scale and growth pattern of Asian megacities have distinctive features which generate a unique set of challenges and opportunities New perspectives are needed to effectively address the transportation problems making the best use of available opportunities This book which is a result of an international collaborative research addresses these challenges by providing insightful analysis and novel viewpoints **Air Transport and Regional Development Case Studies** Anne Graham,Nicole Adler,Hans-Martin Niemeier,Ofelia Betancor,António Pais Antunes,Volodymyr Bilotkach,Enrique J. Calderón,Gianmaria Martini,2020-12-28 This book is one of three inter connected books related to a four year European Cooperation in Science and Technology COST Action established in 2015 The Action called Air Transport and Regional Development ATARD aimed to promote a better understanding of how the air transport related problems of core regions and remote regions should be addressed in order to enhance both economic competitiveness and social cohesion in Europe This book focuses on case studies in Europe related to air transport and regional development It is divided into four geographical regions after a general chapter that compares regional air transport connectivity between remote and central areas in Europe The first region is Northern and Western Northern Europe case studies related specifically to Norway Finland the United Kingdom and Ireland the second is Central and Eastern Europe Bulgaria Bosnia and Herzegovina and Poland the third is Central Western Europe Belgium and Switzerland and finally the fourth is Southern Europe Portugal Spain and Italy There is no other single source publication that currently covers this topic area in such a comprehensive manner by considering so many countries The book aims at becoming a major reference on the topic drawing from experienced researchers in the field covering the diverse experience and knowledge of the members of the COST Action The book will appeal to academics practitioners and policymakers who have a particular interest in acquiring detailed comparative knowledge and understanding of air transport and regional development in many different European countries Together with the other two books Air Transport and Regional Development Methodologies and Air Transport and Regional Development Policies it fills a much needed gap in the literature ITF Round Tables Major Transport Infrastructure Projects and Economic Development International Transport Forum,2014-12-24 This report discusses the state of the art in understanding the economic effects of major transport infrastructure projects It examines the limits of socio economic cost benefit analysis CBA and reviews the development of approaches to assessing the benefits of investment in large projects Handbook on Transport in Asia Sylvia He,2025-05-28 In this comprehensive Handbook Sylvia He brings together an array of leading experts to discuss key research areas and themes prevalent in the study of the transport sector in Asia including urbanisation mobility and accessibility land use planning low carbon technologies the application of big data and the challenges of creating sustainable and inclusive transport systems Chapters cover the diverse range of transport modes across Asia and consider travel behaviour within the context of different transport networks and mobility services Authors discuss planning and design interventions in the transport sector including policies to overcome car

dependency and increase sustainable urban transport Drawing attention to broader transport issues in Asia they examine urban form development and financing constraints infrastructure disparities and socioeconomic and demographic structures that influence access to transport resources for different user groups The authors also consider areas of future research such as low carbon transport emerging technology and smart cities which aim to make transport systems more just and equitable This is an essential read for students researchers and scholars of urban planning geography public policy urban studies and transport particularly those focusing their studies on Asia Transport and mobility policymakers will additionally find the insights beneficial
