Monthly Catalogue, United States Public Documents,1994-06 **Pharmacology** Miles Hacker,William S. Messer,Kenneth A. Bachmann,2009-06-19 Pharmacology meets the rapidly emerging needs of programs training pharmacologic scientists seeking careers in basic research and drug discovery rather than such applied fields as pharmacy and medicine While the market is crowded with many clinical and therapeutic pharmacology textbooks the field of pharmacology is booming with the prospects of discovering new drugs and virtually no extant textbook meets this need at the student level The market is so bereft of such approaches that many pharmaceutical companies will adopt Hacker et al to help train new drug researchers The boom in pharmacology is driven by the recent decryption of the human genome and enormous progress in controlling

genes and synthesizing proteins making new and even custom drug design possible This book makes use of these discoveries in presenting its topics moving logically from drug receptors to the target molecules drug researchers seek covering such modern topics along the way as side effects drug resistance pharmacogenomics and even nutraceuticals one in a string of culminating chapters on the drug discovery process The book is aimed at advanced undergraduates and beginning graduate students in medical pharmacy and graduate schools looking for a solid introduction to the basic science of pharmacology and envisioning careers in drug research Uses individual drugs to explain molecular actions Full color art program explains molecular and chemical concepts graphically Logical structure reflecting the current state of pharmacology and translational research Covers such intricacies as drug resistance and cell death Consistent format across chapters and pedagogical strategies make this textbook a superior learning tool
