Computational Optimization of Internal Combustion Engines Yu Shi, Hai-Wen Ge, Rolf D. Reitz, 2011-06-22 Computational Optimization of Internal Combustion Engines presents the state of the art of computational models and optimization methods for internal combustion engine development using multi dimensional computational fluid dynamics CFD tools and genetic algorithms Strategies to reduce computational cost and mesh dependency are discussed as well as regression analysis methods Several case studies are presented in a section devoted to applications including assessments of spark ignition engines dual fuel engines heavy duty and light duty diesel engines Through regression analysis optimization results are used to explain complex interactions between engine design parameters such as nozzle design injection timing swirl exhaust gas recirculation bore size and piston bowl shape Computational Optimization of Internal Combustion Engines demonstrates that the current multi dimensional CFD tools are mature enough for practical development of internal combustion engines It is written for researchers and designers in mechanical engineering and the automotive industry *6th International Conference on Ignition Systems for SI Engines - 7th International Conference on Knocking in SI Engines* Marc Sens, IAV GmbH IAV GmbH, 2024-10-28 In addition to the indisputably necessary electrification of the transport sector which is currently being ramped up internal combustion engines will still be urgently needed in the future Otherwise the demand for mobility in the on road off road and non road sectors cannot be met There is no doubt that these internal combustion engines will have to be improved regarding efficiency plus lower emissions and nowadays more and more important upgraded for zero and low carbon fuels Even though Spark Ignition SI engines have been around for more than a century there is still a lot of room for improvement particularly in terms of power density ignition combustion control and preventing uncontrolled combustion To offer all interested developers an inspiring exchange platform for the latest developments IAV established two exciting conferences more than two decades ago which are now held under the heading Two Conferences One Goal This volume brings together the contributions to this conference *Ract Bact Laer Clearinghouse clean Air Technology Center annual Report for 2000* Clean Air Technology Center (U.S.), 2001 *Chemical Abstracts*, 1918 *Scientific and Technical Aerospace Reports*, 1995 **COO-**, 1978 *Proceedings of the ...
