Lab Manual Engineering Fitting Workshop:

Workshop / Manufacturing Practices | AICTE Prescribed Textbook - English Veeranna D. Kenchakkanavar, 2021-11-01

The textbook on Workshop Manufacturing Practices is designed to cater the needs of young minds of 21 century. The AICTE model curriculum and National Education Policy has driven a new wave in the technical education. The textbook is designed not only to cater the need of the syllabus but also to look things in a different perspective. The Workshop is the place where the core of learning about different materials, equipment, tools and techniques takes place. Basically, the workshop is used to prepare the small components by hand tools. Sometimes they may be parts of the large machines or may be parts for replacement repairs. In this text book, an attempt has been made to connect the conventional tools usage to advanced machine tools usage. The relevant practical examples are quoted to make the readers more comfortable with product and processes. The blooms taxonomy is followed in construction of each chapter and exercises. The objective and multiple questions with higher order thinking may help the readers to not only to face the semester end exam even they may help in competitive and other examinations.
