Data Structures with Java Joe Kent, Lewis Barnett, 2002. This textbook for a second course in computer science uses a very straightforward approach to explain techniques for organizing and managing data in Java programs. The 16 laboratories introduce recursion, linked lists, iteration, stacks, binary trees, file compression, and basic graphics classes. *Experiments in Java* Samuel A. Rebelsky, 2000. This lab manual is appropriate for any Introduction to Programming course that uses the Java programming language. Its hands-on exercises are intended to help students improve their understanding of the fundamental structures in Java. The order of the topics in this manual reflects an object's first approach with the goal of helping students understand the object-oriented paradigm. This manual is divided into three parts. The first part presents the core of the Java language. These six sessions provide experience with core features and principles of the Java programming language. They provide enough breadth and depth for readers to learn more of Java on their own or in later courses. The second part of the manual helps students explore issues pertaining to algorithms. Recursion is considered here as well as important searching algorithms. Finally, methods of algorithm analysis are examined. The final part of the manual covers a number of additional topics that are not described in the core sessions, such as graphics, inheritance, and object design. Features include: eighteen laboratories, each with Introductory Material, New Skills that students will develop in the exercise, Prerequisite Skills to ensure students are prepared for the session, Required Files to use, modify, and extend in the exercises, Discussion of topics covered in the laboratory session, Experiments to reinforce the discussion, Post-Laboratory Problems to enhance understanding, Notes on selected problems, Focuses on applications but includes optional material on applets. Provides an object's first approach to working with Java. Written on the Java 2 platform. Designed to work with any Java textbook.
