Perspective: Employing The Unemployable Walter Block,2008-03-28 Labor is the most important of the three traditional factors of production land labor and capital accounting for some 75% of the GDP It is therefore important to focus on issues of labor economics In this book the approach taken will be that of the free market philosophy of libertarianism the perspective that allows the maximum of freedom consistent with the responsibility of all to respect the equal rights of all others The position of this book on unions is unique outside of the libertarian movement and this is indicative of its analysis of several other issues such as minimum wages For scholars on the left it is almost true that unions can do no wrong for Marxists they do not do enough but that is another story Their role is to raise wages for the workingman and this task is almost unstintingly applauded Conservatives on the other hand oppose unions root and branch except for their support of foreign wars which is also another story To this end they support a welter of regulations designed to reduce their power limitations of check offs forced secret ballots etc For libertarians the analysis depends intimately on whether or not these are voluntary organizations If they are there is no more justification for imposing secret ballots on them than to do so for the chess or garden club If they are not they should not be weakened by restrictions but rather banned and their leaders imprisoned **Modern Labor Economics** Ronald G. Ehrenberg,Robert Stewart Smith,2011 This textbook surveys the field of labour economics with the authors developing the modern theory of labour market behaviour summarizing empirical evidence supporting or contradicting each hypothesis and illustrating the usefulness of various theories for public policy
