Century Learning provides needed answers to the nation's growing concerns about educational testing in America. Drawing on research and the experiences of leading states and countries, this new book examines how performance assessments can offer a feasible alternative to current high stakes tests. As parents, educators, and policymakers have increasingly criticized the effects of the teaching to the test mandate from the No Child Left Behind Act, the need for this resource has never been more critical. This summary volume to *Beyond the Bubble Test* speaks to the nationwide unease about current tests' focus on low level skills like recalling and restating facts rather than higher order skills such as problem solving, analyzing, and synthesizing information. It illustrates how schools can use authentic assessments to improve teaching and learning as they involve students in conducting research, designing investigations, developing products and solutions using technology, and communicating their ideas in many forms. This important book serves as a must have resource for those interested in the most current research about how to create valid and reliable performance assessments. Explains how educators can improve practice by developing, using, and scoring performance assessments. Helps policymakers and educators accurately assess the benefits and possibilities of adopting performance assessments nationally. If you're an educator, researcher, graduate student, district administrator, or education policy specialist, *Next Generation Assessment* is an indispensable resource you'll turn to again and again.

From Notepad to iPad Matthew Gillispie, 2013-11-26 This book is a one stop shop for secondary teachers looking to use iPads effectively in the classroom. Special Features: Screen shots and other visuals to help you use the recommended apps and websites. Strategies for managing technology use in the classroom. Lesson plans that effectively teach literacy and content through the use of technology. Connections to the Common Core State Standards. Samples of student work using iPads. Rubrics for a variety of suggested assignments.

Normal Instructor and Teachers World, 1924 Writing Instruction That Works Arthur N. Applebee, Judith A. Langer, 2015-04-25 Backed by solid research, *Writing Instruction That Works* answers the following question: What is writing instruction today and what can it be tomorrow? This up to date comprehensive book identifies areas of concern for the ways that writing is being taught in today's secondary schools. The authors offer far reaching direction for improving writing instruction that assist both student literacy and subject learning. They provide many examples of successful writing practices in each of the four core academic subjects: English, mathematics, science, and social studies/history, along with guidance for meeting the Common Core standards. The text also includes sections on Technology and the Teaching of Writing and English Language Learners.
