*An Introduction to the Green Economy* Adrian C. Newton, Elena Cantarello, 2014-08-13 The green economy is widely seen as a potential solution to current global economic and environmental crises and a potential mechanism by which sustainable development might be achieved in practice Considerable investments are now being made into the development of green technology renewable energy biodiversity conservation resource efficiency recycling of materials and green infrastructure This textbook provides a comprehensive introduction to the green economy using a strongly interdisciplinary approach based on environmental science rather than treating it as a sub set of economics The scientific principles of sustainability are presented which provide the foundations of the green economy with a particular focus on systems based approaches Examples of real world case studies are used to

illustrate how the green economy can be achieved in practice In this way the authors provide a thorough overview of both the principles and practice of the green economy drawing from a wide range of disciplines including ecology geography social science psychology sustainability science environmental science law and economics The emphasis is on presenting results of the latest research derived from leading scientific journals Rather than focusing on a single definition of what constitutes a green economy the book introduces readers to the diversity of opinion that exists and engages them in what is an active on going debate This reflects the fact that many aspects of the green economy and sustainable development more generally are currently contested In particular the book will help readers to strengthen their ability to critically evaluate the evidence for and against the views presented and to actively contribute to the future development of the green economy The Oxford Handbook of Environmental Political Theory Teena Gabrielson, Cheryl Hall, John M. Meyer, David Schlosberg, 2016-01-07 Set at the intersection of political theory and environmental politics yet with broad engagement across the environmental social sciences and humanities The Oxford Handbook of Environmental Political Theory defines illustrates and challenges the field of environmental political theory EPT Featuring contributions from distinguished political scientists working in this field this volume addresses canonical theorists and contemporary environmental problems with a diversity of theoretical approaches The initial volume focuses on EPT as a field of inquiry engaging both traditions of political thought and the academy In the second section the handbook explores conceptualizations of nature and the environment as well as the nature of political subjects communities and boundaries within our environments A third section addresses the values that motivate environmental theorists including justice responsibility rights limits and flourishing and the potential conflicts that can emerge within between and against these ideals The final section examines the primary structures that constrain or enable the achievement of environmental ends as well as theorizations of environmental movements citizenship and the potential for on going environmental action and change **Critical Environmental Politics** Carl Death, 2013-12-04 The aim of this book is to review central concepts in the study of environmental politics and to open up new questions problems and research agendas in the field The volume does so by drawing on a wide range of approaches from critical theory to poststructuralism and spanning disciplines including international relations geography sociology history philosophy anthropology and political science The 28 chapters cover a range of global and local studies illustrations and cases These range from the Cochabamba conference in Bolivia to climate camps in the UK UN summits in Rio de Janeiro and Johannesburg to climate migrants from Pacific islands forests in Indonesia to Dutch energy governance reform indigenous communities in Namibia to oil extraction in the Niger Delta survivalist militias in the USA to Maasai tribesmen in Kenya Rather than following a regional or issue based e g water forests pollution etc structure the volume is organised in terms of key concepts in the field including those which have been central to the social sciences for a long time such as citizenship commodification consumption feminism justice movements science security the state summits and technology those which have been at the heart of environmental

politics for many years including biodiversity climate change conservation eco centrism limits localism resources sacrifice and sustainability and many which have been introduced to these literatures and debates more recently biopolitics governance governmentality hybridity posthumanism risk and vulnerability Features and benefits of the book Explains the most important concepts and theories in environmental politics Reviews the core ideas behind crucial debates in environmental politics Highlights the key thinkers both classic and contemporary for studying environmental politics Provides original perspectives on the critical potential of the concepts for future research agendas as well as for the practice of environmental politics Each chapter is written by leading international authors in their field This exciting new volume will be essential textbook reading for all students of environmental politics as well as provocatively presenting the field in a different light for more established researchers

**Growing Wales' Civil Society** John Osmond,2011 This book reports a Welsh debate around the key findings of the Carnegie Trusts Commission of an Inquiry into the Future of Civil Society in the UK and Ireland published in March 2010 The aim was to ask how the Carnegie findings relate to the emergence of Welsh civil society following a decade of devolution

**Innovations and Traditions for Sustainable Development** Walter Leal Filho,Eugene V. Krasnov,Dara V. Gaeva,2021-10-16 This book highlights the vital necessity for combining sustainable development processes from different areas with applications in areas such as science education and production sectors These sectors have previously been separated by linguistic and technological barriers Breaking down these barriers will allow an interdisciplinary and transdisciplinary flow of information leading to greater efficiency and towards a more real resilient and sustainable economy development This book fills in the gap in respect of publications addressing aspects of innovation and sustainable development and focuses on a range of areas such as I Gradual transition to innovative development II Continuity of technology in education science and industry III Convergency directions interdisciplinary relations in scientific research IV Digital technologies for sustainable development V Global trends and regional aspects of innovation and traditions in environmental management VI International legal regulations and environmental and economic relations among business communities The publication fosters the global efforts towards taking better advantage of the many opportunities which innovation in specific areas may offer

**New frontiers of marine governance in the ocean decade** Helena Calado,Catarina Frazão Santos ,José Guerreiro,Jan Van Tatenhove,Marie Bonnín,2023-08-30

**Environmental Leadership** Deborah Rigling Gallagher,2012-09-06 Part of the SAGE Reference Series on Leadership this 2 volume set tackles issues relevant to leadership in the realm of the environment and sustainability Volume 1 of Environmental Leadership A Reference Handbook considers such topics as environmental thought leadership environmental ethics conservation eco feminism collective action and the commons and what we have termed contrarians political leadership the environmental challenge context for the expression of political leadership governmental leadership government initiatives to provide leadership in environmental management private sector leadership private sector leadership in environmental

management as individuals through organizations or through specific initiatives nonprofit leadership nonprofit sector leadership in topical areas such as conservation advocacy philanthropy and economic development signaling events events and their impact on the exercise of environmental leadership through individual political and organizational actions grassroots activism profiles of individual environmental activists and considerations of how environmental leadership is exercised through activism environmental leadership in journalism literature and the arts and environmental leadership in education In Volume 2 we cover topics that confront the particular intractable characteristics of environmental problem solving Individual chapters focus on how environmental leadership actions or initiatives may be applied to address specific problems in context offering both analyses and recommendations Overarching themes in this volume include taking action in the face of uncertainty mitigating climate change impacts adapting to climate change protecting coastal ecosystems protecting wetlands and estuaries preserving forest resources protecting critical aquifers preventing the spread of invasive species and identifying and conserving vital global habitats promoting international cooperation in the face of conflicting agendas designing and implementing climate change policy reconciling species protection and free trade allocating scarce resources designing sustainable fisheries addressing global overpopulation preventing trade in endangered species conserving global biodiversity and mitigating ocean debris and pollution addressing conflicts between economic progress and environmental protection preserving open space redesigning cities promoting ecotourism redeveloping brownfields designing transit oriented development confronting impacts of factory farming preventing non point source agricultural pollution confronting agricultural water use addressing the impacts of agrochemicals designing sustainable food systems and valuing ecosystem services addressing complex management challenges energy efficiency solar energy wind energy hydrogen economy alternative vehicles solid waste disposal hazardous waste disposal electronic waste disposal life cycle analysis and waste to energy and addressing disproportionate impacts on the poor and the weak preventing export of developed world waste to developing countries minimizing co location of poverty and polluting industries protecting the rights of indigenous peoples preventing environmental disease protecting children s health providing universal access to potable water and protecting environmental refugees The final three chapters examine next generation environmental leaders **Green**

valuable practical skills      *Beyond the Instrumentalised Economy* Garrett Thomson, 2025-01-27 The concept of an economy requires us to characterise what human life and society are fundamentally about or what is valuable and why This includes our social relations with each other and to the ecosystems we live in as well as our happiness well being and flourishing Beyond the Instrumentalised Economy defines what work consumption and the use of natural resources would look like if they were not instrumentalised This enables the reader to see how a company would work in a non instrumentalised economy and what would constitute a non instrumentalised market Based on this the book provides insight concerning how investment would work in such an economy and the main features of a non instrumentalised financial system      **Money and Sustainability** Christian Arnsperger Bernard Lietaer, Sally Goerner Stefan Brunnhuber, 2012-05-30 In 1972 the first Report for the Club of Rome The Limits to Growth famously spelled out the unsustainable consequences of an economic system that demands infinite growth in a finite world Just as The Limits to Growth exposed the catastrophic flaws in our economic system this new Report from the Club of Rome exposes the systemic flaws in our money system and the wrong thinking that underpins it It describes the ongoing currency and banking crises we must expect if we continue with the current monopoly system and the vicious impact of these crises on our communities our society as a whole and our environment Our money system is outdated brittle and unfit for purpose It is responsible for the endless cycle of boom and bust it systematically widens the gap between rich and poor it creates unemployment and multiplies other extremely adverse social effects of any financial economic crisis it undermines sustainability initiatives it disables vitally needed national and international action to limit multiple threats to the environment and the biosphere It is the single structural cause common to all financial and monetary instability Money and Sustainability The Missing Link Report from the Club of Rome proposes an alternative a monetary ecosystem with complementary currencies working alongside the conventional one This is more flexible resilient fair and sustainable Societies worked like this in the past So can we The book first explains these systemic problems in detail It s written in a way that s clearly accessible to the general public although it references at length a wide range of technical topics economics theory the history and institutions of banking the physics of complex flow networks the science of sustainability and population trends and climate change This gives a framework for understanding the present money system The authors then describe their proposal for an alternative money ecosystem which systematically addresses and resolves the problems created by the present system Finally this practical proposal is illustrated by nine case studies of different complementary currencies which are either running now in development or could be implemented at short notice in individual cities and regions around the world      **Green Atlas** Dustin Mulvaney, 2013-07-03 This reference resource in atlas format is an online only compendium of maps and data sets accompanied by multimedia elements designed to illustrate key concepts in green issues and environmentalism graphically and interactively Topics for the maps presented in this work were selected from articles in the 12 volume SAGE Reference Series on Green Society Toward a Sustainable Future Each map

includes links to one or more of the series articles Maps include interactive components with clickable icons to deliver the data and statistics that make up each map Further multimedia elements photos video and audio clips and transcripts accompany map themes and presentations

**Money and Sustainability** Bernard Lietaer, 2012-05-30 A report from the Club of Rome EU Chapter to Finance Watch and the World Business Academy Foreword by Dennis Meadows co author of the 1972 Club of Rome report The Limits to Growth

**The Bioregional Economy** Molly Scott Cato, 2013 In a world of climate change and declining oil supplies what is the plan for the provisioning of resources Green economists suggest a need to replace the globalised economy and its extended supply chains with a more local economy But what does this mean in more concrete terms How large is a local economy how self reliant can it be and what resources will still need to be imported The concept of the bioregion developed and popularised within the disciplines of earth sciences biosciences and planning may facilitate the reconceptualisation of the global economy as a system of largely self sufficient local economies A bioregional approach to economics assumes a different system of values to that which dominates neoclassical economics The global economy is driven by growth and the consumption ethic that matches this is one of expansion in range and quantity Goods are defined as scarce and access to them is a process based on competition The bioregional approach challenges every aspect of that value system It seeks a new ethic of consumption that prioritises locality accountability and conviviality in the place of expansion and profit it proposes a shift in the focus of the economy away from profits and towards provisioning and it assumes a radical reorientation of work from employment towards livelihood This book by leading green economist Molly Scott Cato sets out a visionary and yet rigorous account of what a bioregional approach to the economy would mean and how to get there from here

How Compassion can Transform our Politics, Economy, and Society Matt Hawkins, Jennifer Nadel, 2021-11-29 How Compassion can Transform our Politics Economy and Society draws together experts across disciplines ranging from psychology to climate science philosophy to economics history to business to explore the power of compassion to transform politics our society and our economy The book shows that compassion can be used as the basis of a new political economic and social philosophy as well as a practical tool to address climate breakdown inequality homelessness and more Crucially it also provides a detailed plan for its execution It marks the first time that the study of compassion has been applied across multiple disciplines The book provides a template for the study of compassion on an interdisciplinary basis and will appeal to academics professionals and the general reader searching for a fresh and inspiring approach to the seemingly intractable problems facing the world

Developing Leadership Christopher Mabey, Wolfgang Mayrhofer, 2015-06-18 What kind of a leader do you want to become The role of business schools in developing future managers and leaders has long been scrutinised and critiqued This has been exacerbated by the recent financial crisis and many books have been written that condemn business schools for producing leaders who graduate without the ability to respond to the changing world around them innovate or act in a responsible way By way of remedy this provocative book

takes the critique and debate further proposing a number of ethical and spiritual resources including Heiggarian philosophy classical Greek philosophy and the Maori notion of wairua It explores existing teaching practices and suggests ways that business schools can Encourage a greater understanding of different world views Introduce different perspectives such as the arts philosophy and spirituality Encourage the practice of responsible and ethical leadership Nurture innovation and creativity Developing Leadership is accompanied by filmed seminars exploring the central debates and interviews with the expert team of contributors A rare thing this book gives more than the label promises The title is about questions yet each chapter gives us answers to why important issues are not addressed in business schools and what to do about it This is a manifesto for reform and the next big question is what will you reader do about it Professor Jonathan Gosling Director Centre for Leadership Studies University of Exeter UK and Distinguished Visiting Professor of Leadership Development INSEAD France

**Inclusive Educational Practices and Technologies for Promoting Sustainability** Behera, Santosh Kumar,Ibrahim, Atyaf Hasan,Romdhani, Faten,2024-06-17 In today s rapidly evolving world the digital learning gap presents a significant challenge impacting the effectiveness of education and the development of essential skills for future generations Traditional teaching methods often fail to meet students diverse needs leading to a skills gap between current and future workers Additionally the ambiguity in defining concepts such as the heap paradox and the inadequacies of traditional economic measures like GDP highlights the need for more nuanced and comprehensive approaches to education environmental psychology and sustainable development Inclusive Educational Practices and Technologies for Promoting Sustainability offers a multifaceted solution to these pressing issues by exploring the transformative potential of Educational Technology EdTech the insights of environmental psychology and the importance of holistic measures of human welfare By showcasing how EdTech can bridge the digital learning gap enabling teachers to employ diverse strategies and better meet students needs we demonstrate its potential to revolutionize education and support the growth of the next generation The book also delves into the paradox of the heap where logic vagueness and philosophy complicate our methods of thinking It illustrates the complexities of everyday concepts and their relevance to environmental psychology while advocating for a deeper understanding of the human nature relationship

**Sustainable Business Change** Vladimir Obradović,2023-03-31 This volume aims to explore project management contributions to sustainable business change based on renewability reuse and repair as well as the effect of circular economy business solutions on project management in terms of the management approach governance and leadership The main aim of integrating project management with a circular business paradigm is not only to learn how project management can contribute to achieving circular economy principles but also to understand the impact of business needs on project management By understanding these needs recommendations can be developed and promoted among different stakeholders such as governments financial institutions and education institutions with the goal of supporting and assisting project management to drive sustainable business change This approach will enable readers to

assess how project management professions can support a shift toward sustainable business The primary audience of this work is management scholars educators researchers and students Scholars government representatives financial institutions management educators start up companies innovative entrepreneurs and all others who use the circular economy to support sustainable development can also find much of use in this book     *A Modern Guide to Citizen's Basic Income* Malcolm Torry, 2020-06-26 Debate on the desirability feasibility and implementation of a Citizen s Basic Income an unconditional nonwithdrawable and regular income for every individual is increasingly widespread among academics policymakers and the general public There are now numerous introductory books on the subject and others on particular aspects of it This book provides something new It studies the Citizen s Basic Income proposal from a variety of different disciplinary perspectives the economics of Citizen s Basic Income the sociology of Citizen s Basic Income the politics of Citizen s Basic Income and so on Each chapter discusses the academic discipline and relevant aspects of the debate and asks how the discipline enhances our understanding and how the Citizen s Basic Income debate might contribute to the academic discipline
