Handleidingen Schaakcomputers Manuals Chess Computers:

How Computers Play Chess David N. L. Levy, Monroe Newborn, Monty Newborn, 2009-03 It now appears possible even likely that within a few decades and within certain specialized domains the computer will be more intelligent than we ourselves What was unimaginable a few years ago is happening today with alarming rapidity A small piece of silicon no larger than a thumbnail can exhibit more intelligence than the best human brains This book attempts to satisfy two different goals It presents a comprehensive history of computer chess along with many rare examples of the play of early programs These examples contain both amazing strokes of brilliance and inexplicable catastrophes they will give the reader a dear perspective of the pioneer days of computer chess In contrast contemporary programs are capable of defeating International Grandmasters the text contains several recent examples including a remarkable victory over former World Champion Anatoly Karpov The remainder of the book is devoted to an explanation of how the various parts of a chess program are designed and how they function Readers who have no knowledge of computers will gain insight into how they think Readers who own a personal computer and who want to write their own chess programs will find sufficient information in this book to enable them to make a good start *The Chess Computer Handbook* David N. Botvinnik, 2011-09-26 Much water has flowed over the dam since this book went to press in Moscow One might expect that PIONEER would have made substantial advances unfortunately it has not There are reasons the difficulty of the problem the disenchantment of the mathematicians because of the delays and drawing out of the work and principally the insufficiency and some times complete lack of machine time The general method used by PIONEER to solve complex multidimensional search problems had already been formulated at that time It was supposed that the successful completion of the chess program PIONEER I would provide a sufficient validation for the method We did not succeed in completing it But unexpectedly PIONEER's method obtained a different kind of validation Since our group of mathematicians works at the Institute for Electrodynamics we were invited to solve some energy related problems and were assigned the task of constructing a program that would plan the reconditioning of the equipment in power stations initially for one month Until then the technicians had been preparing such plans without the aid of computers Although the chess program was not complete even after ten years the program PIONEER 2 for computing the monthly repair schedule for the Interconnected Power System of Russian Central was completed in a few months In mid October of 1980 a medium speed computer constructed the plan in 40 seconds When at the end of the month the mathematician A **Chess Software User's Guide** Byron Jacobs, Jacob Aagaard, John Emms, 2003 Interested in chess and computers Then this groundbreaking book is perfect Whether you are talking about the latest chess playing programs or chess database software this book answers all of the questions you ever needed to ask A team of experts all *The Chess Computer Book* T.
