Manuscript Poetics Francesco Marco Aresu, 2023-11-15 Manuscript Poetics explores the interrelationship between the material features of textual artifacts and the literary aspects of the medieval Italian texts they preserve This original study is both an investigation into the material foundations of literature and a reflection on notions of textuality writing and media in late medieval and early modern Italy Francesco Marco Aresu examines the book objects of manuscripts and early printed editions asking questions about the material conditions of production circulation and reception of literary works He invites scholars to reconcile reading with seeing and with touching and to challenge contemporary presumptions about technological neutrality and the modes of interfacing and reading Manuscript Poetics investigates the correspondences between textuality and materiality content and medium and visual verbal messages and their physical support through readings of Dante Alighieri's *Vita nova* Giovanni Boccaccio's *Teseida* and Francesco Petrarca's *canzoniere* *Rerum vulgarium fragmenta* Aresu shows that Dante Boccaccio and Petrarca evaluated and deployed the tools of scribal culture to shape signal or layer meanings beyond those they conveyed in their written texts Medieval texts Aresu argues are uniquely positioned to provide this perspective and they are foundational to the theoretical understanding of new forms and materials in our media saturated contemporary world

You Say to Brick Wendy Lesser, 2017-03-14 Born in Estonia 1901 and brought to America in 1906 the architect Louis Kahn grew up in poverty in Philadelphia By the time of his mysterious death in 1974 he was widely recognized as one of the greatest architects of his era Yet this enormous reputation was based on only a handful of masterpieces all built during the last fifteen years of his life Wendy Lesser's You Say to Brick The Life of Louis Kahn is a major exploration of the architect's life and work Kahn perhaps more than any other twentieth century American architect was a public architect Rather than focusing on corporate commissions he devoted himself to designing research facilities government centers museums libraries and other structures that would serve the public good But this warm captivating person beloved by students and admired by colleagues was also a secretive man hiding under a series of masks Kahn himself however is not the only complex subject that comes vividly to life in these pages His signature achievements like the Salk Institute in La Jolla the National Assembly Building of Bangladesh

and the Indian Institute of Management in Ahmedabad can at first seem as enigmatic and beguiling as the man who designed them. In attempts to describe these structures we are often forced to speak in contradictions and paradoxes: structures that seem at once unmistakably modern and ancient, enormous built spaces that offer a sense of intimate containment, designs in which light itself seems tangible, a raw material as tactile as travertine or Kahn's beloved concrete. This is where Lesser's talents as one of our most original and gifted cultural critics come into play. Interspersed throughout her account of Kahn's life and career are exhilarating in situ descriptions of what it feels like to move through his built structures. Drawing on extensive original research, lengthy interviews with his children, his colleagues and his students, and travel to the far-flung sites of his career-defining buildings, Lesser has written a landmark biography of this elusive genius, revealing the mind behind some of the twentieth century's most celebrated architecture.

The Art Museums of Louis I. Kahn Patricia Cummings Loud, Louis I. Kahn, 1989. The art museum has become a prestige commission for contemporary architects and for several decades reference has been made to a museum building boom. Among these new museums, those of Louis Kahn are especially admired. This significant American architect, who ranks in this century with Frank Lloyd Wright both as a creator and as an influence, has made a special contribution to the architecture of museums and has helped create a subtle but telling change in the concept of what a late twentieth century museum building should be. After a brief look at the development of a tradition in museum architecture, this study examines Kahn's three art museums: the Yale University Art Gallery, the Kimbell Art Museum, and the Yale Center for British Art. It traces the development of each museum through its various stages: the background of the institutions and the commissions; the programs for the buildings; their designs and evolutions; their constructions; and the evaluations of the completed buildings. Material on Kahn's plans for a museum for the De Menil collection, begun shortly before his death, is also included. Accompanying the text are illustrations of the buildings, including Kahn's personal sketches, architectural plans and sections, and presentation perspective drawings. Photographs of the finished buildings present the transformed vision of the architect in tangible form, showing that the museums, while related, are individualized accomplishments. This is the first comprehensive study of Kahn's museums.
