

**Abstract**

**RESEARCH AND DEVELOPMENT, NEW PRODUCTS**  
 Research is being conducted by the Department of Agriculture, Bureau of Plant Industry, in cooperation with the Department of the Interior, Bureau of Land Management, and the Department of the Interior, Bureau of Reclamation, to determine the effect of the use of the various types of irrigation systems on the growth and yield of the various types of crops. The results of this research will be used to determine the most efficient and economical method of irrigation for each type of crop and soil.

[illegible][illegible]

1. The first step in the process is to identify the problem. This involves gathering information about the situation and the people involved. It is important to understand the context and the stakes of the problem.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

It is, however, not clear how the findings of this study can be applied to the general population. The study was conducted in a specific population, and the results may not be generalizable to other populations. Further research is needed to determine the applicability of these findings to other populations.

1. *Chlorophyll a* and *Chlorophyll b* were determined using a spectrophotometer (Shimadzu UV-160U) at 663 nm and 646 nm, respectively. The concentration of chlorophyll was calculated using the following equations:  $\text{Chlorophyll } a = 12.7 \times \text{OD}_{663} - 2.13 \times \text{OD}_{646}$  and  $\text{Chlorophyll } b = 21.6 \times \text{OD}_{646} - 5.1 \times \text{OD}_{663}$  (Arar and Collins, 1997).
