Handbook on Impact Evaluation Shahidur R. Khandker, Gayatri B. Koolwal, Hussain A. Samad, 2009-10-13 Public programs are designed to reach certain goals and beneficiaries. Methods to understand whether such programs actually work as well as the level and nature of impacts on intended beneficiaries are main themes of this book. **World Bank Group**

Impact Evaluations World Bank, 2013-03-12 Over the past decade the development community has focused more on measuring results so the use of impact evaluations has expanded rapidly. IEG examines the relevance, quality, and influence of World Bank and IFC impact evaluations. **RealWorld Evaluation** Michael Bamberger, Linda Mabry, 2019-07-31 RealWorld Evaluation Working Under Budget Time Data and Political Constraints addresses the challenges of conducting program evaluations in real world contexts where evaluators and their clients face budget and time constraints. The book is organized around the authors' seven-step model that has been tested in workshops and practice environments to help the evaluation implementers and managers make the best choices when faced with real world constraints. The Third Edition includes a new chapter on gender equality and women's empowerment and discussion of digital technology and data science. **Going Universal** Daniel Cotlear, Somil Nagpal, Owen Smith, Ajay Tandon, Rafael Cortez, 2015-09-25 The quest for universal health coverage (UHC) has gathered real momentum over the past decade with countries on every continent now taking part. This is welcome news since a lack of universal coverage means that hundreds of millions of people around the world either do not get the health care services they need or they have to pay dearly for them, often falling into poverty as a result. But the UHC agenda also poses an enormous challenge to policy makers across the globe and many countries are eager to learn from the experiences of others as they undertake the long journey toward UHC. **Going Universal: How 24 Developing Countries Are Implementing Universal Health Coverage Reforms from the Bottom Up** draws on a wealth of new evidence to help enrich the global knowledge base on UHC. It provides a synthesis of UHC reform programs that placed a special focus on expanding coverage in ways inclusive of the poor. The main objective was to document and analyze their experiences based on a systematic data collection effort that sought to capture in great detail how they have been implementing UHC reforms. The main chapters offer an in-depth analysis of how countries are addressing five key challenges covering people expanding benefits, managing money, improving the supply of health care services, and strengthening accountability. The UHC reform programs described in the volume are new, massive, and transformational. Most were launched during the past decade and together they now cover more than 2 billion people. But most importantly, the authors find that the programs are fundamentally changing the way health systems operate, offering the potential to achieve greater equity and better results for the money spent. The authors identify key risks that lie ahead as well as an emerging agenda that requires more country and global learning. Overall, this book offers those contributing to the achievement of UHC worldwide a valuable new resource to help chart a way forward. *Impact Evaluation in Practice, Second Edition* Paul J. Gertler, Sebastian Martinez, Patrick

Premand, Laura B. Rawlings, Christel M. J. Vermeersch, 2016-09-12 The second edition of the *Impact Evaluation in Practice* handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners First published in 2011 it has been used widely across the development and academic communities The book incorporates real world examples to present practical guidelines for designing and implementing impact evaluations Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence based policies and programs The updated version covers the newest techniques for evaluating programs and includes state of the art implementation advice as well as an expanded set of examples and case studies that draw on recent development challenges It also includes new material on research ethics and partnerships to conduct impact evaluation The handbook is divided into four sections Part One discusses what to evaluate and why Part Two presents the main impact evaluation methods Part Three addresses how to manage impact evaluations Part Four reviews impact evaluation sampling and data collection Case studies illustrate different applications of impact evaluations The book links to complementary instructional material available online including an applied case as well as questions and answers The updated second edition will be a valuable resource for the international development community universities and policy makers looking to build better evidence around what works in development

Information and Communication Technologies for Development Evaluation Oscar A. García, Prashanth Kotturi, 2019-07-09 Written by a team of expert practitioners at the Independent Office of Evaluation of International Fund for Agricultural Development IFAD this book gives an insight into the implications of new and emerging technologies in development evaluation Growing technologies such as big data analytics machine learning and remote sensing present new opportunities for development practitioners and development evaluators particularly when measuring indicators of the Sustainable Development Goals The volume provides

an overview of information and communication technologies ICTs in the context of evaluation looking at the theory and practice and discussing how the landscape may unfold It also considers concerns about privacy ethics and inclusion which are crucial issues for development practitioners and evaluators working in the interests of vulnerable populations across the globe Among the contributions are case studies of seven organizations using various technologies for data collection analysis dissemination and learning This valuable insight into practice will be of interest to researchers practitioners and policymakers in development economics development policy and ICT

Impact of risk-contingent credit and traditional credit on smallholders' agricultural investment and productivity: Experimental evidence from Kenya Ndegwa, Michael K.,Shee, Apurba,Ward, Patrick S.,Liu, Yanyan,Turvey, Calum G.,You, Liangzhi,2025-01-17 We use a multiyear multi arm randomized controlled trial implemented among 1 053 smallholders in Kenya to evaluate ex ante investment and ex post productivity and welfare benefits of two competing lending models risk contingent credit RCC which embeds crop insurance with a loan product and traditional credit TC We rely on local average treatment effects to demonstrate the effects of these alternative credit products on borrowers but report the intention to treat effects for their broader policy significance Uptake of RCC increased treated households farm investments specifically adoption of chemical fertilizers by up to 14 percent along the extensive margins and by more than 100 percent along the intensive margins while TC s effects were less in both magnitude and statistical significance Neither type of credit product had a significant effect on the overall area cultivated under maize hence enhancing agricultural intensification but not extensification Ex post neither type of credit product had a strong direct effect on households productivity We conclude that access to credit has potential to increase investment and productivity among smallholders although improved productivity needs better measurement and extended intervention to be realized To scale the potential effects of credit derisking access to credit should be considered to expand access to credit

Causality in Policy Studies Alessia Damonte,Fedra Negri,2023-02-13 This volume provides a methodological toolbox for conducting policy research Recognizing that policy research spans various academic disciplines each of which takes a different view on causality the volume introduces a methodologically pluralistic approach to policy studies Each chapter clarifies the research question that each technique can answer the research design and data treatment that each technique requires for its results to be sound the validity domain of its results and the actual deployment of the technique through a replicable example Techniques covered include quasi experimental designs approaches to account for selection bias and observed imbalances directed acyclic graphs and structural equation models Qualitative Comparative

Analysis Bayesian case study and process tracing and Agent Based Modelling By working through the volume readers will understand how to learn from different techniques apply them consciously and triangulate them to make better sense of findings This volume is intended for advanced academic courses as well as scholars and practitioners in policy related fields such as political science economics sociology and public administration This is an open access book [Firm-Level Innovation In Africa](#) Abiodun Egbetokun, Richmond Atta-Ankomah, Oluseye Jegede, Edward Lorenz, 2020-04-29 The literature on innovation in Africa is rapidly expanding and a recurring thread in the emergent literature is the pervasiveness of systemic weaknesses that inhibit the innovation process Despite these firms are able to innovate in Africa It is then logical to ask how do African firms manage to overcome the prevalent constraints and learn to innovate This book directly tackles this question with a view to improving our understanding of the innovation landscape in Africa The book brings together some of the latest innovation research from across the African continent ranging from Tanzania and Ethiopia in the east to Nigeria in the west The chapters included in the collection adopt different but complementary theoretical and methodological approaches to address a rich mix of interrelated issues These issues include the factors that enhance or inhibit innovation in African firms the sources of knowledge information for innovation policy options for overcoming constraints and facilitating firm level innovation the nature and roles of brokers and intermediaries in dealing with innovation constraints and in facilitating the innovation process and the role of interactive learning and acquisition of embodied technology in the innovation process This book was originally published as a special issue of Innovation and Development [Agricultural Economics](#) Ifeoluwapo Amao, Iyabo Adeoye, 2021-12-15 This book discusses pertinent aspects of agricultural economics and rural development It includes case studies that assess the impact of tomato cultivation on food security and poverty alleviation of rural dwellers and agricultural producers Additionally it examines farmers knowledge of organic livestock farming a novel method of livestock production The book also contains a review of factors affecting the efficiency of vegetable production and the basics of good agribusiness plans for successful agribusiness activities [Impact Evaluation in Practice](#); [La Evaluación de Impacto en la Práctica](#) Paul J. Gertler, Sebastian Martinez, Patrick Premand, Laura B. Rawlings, Christel M. J. Vermeersch, 2011-06-13 This book offers an accessible introduction to the topic of impact evaluation and its practice in development While the book is geared principally towards development practitioners and policymakers designing prospective impact evaluations we trust that it will be a valuable resource for students and others interested in using impact evaluation Prospective impact evaluations should be used selectively to assess whether or not a program has achieved its intended results or to test alternatives for achieving those results We consider that more and better impact evaluation will help strengthen the evidence base for development policies and programs around the world If governments and development practitioners can make policy decisions based on evidence including evidence generated through impact evaluation our hope is that development resources will be spent more effectively and ultimately have a greater impact on

reducing poverty and improving people's lives. The three chapters in this handbook provide a non-technical introduction to impact evaluations including Why Evaluate in Chapter 1, How to Evaluate in Chapter 2, and How to Implement Impact Evaluations in Chapter 3. These elements are the basic tools needed in order to successfully carry out an impact evaluation. From a methodological standpoint, our approach to impact evaluation is largely pragmatic; we think that the most appropriate methods should be identified to fit the operational context and not the other way around. This is best achieved at the outset of the program through the design of prospective impact evaluation that can be built into the project's implementation. We argue that gaining consensus between key stakeholders and identifying an evaluation design that fits the political and operational context is as important as the method itself. We also believe strongly that impact evaluations should be upfront about their limitations and caveats. Finally, we strongly encourage policymakers and program managers to consider impact evaluations in a logical framework that clearly sets out the causal pathways by which the program works to produce outputs and influence final outcomes and to combine impact evaluations with monitoring and selected complementary evaluation approach to gain a full picture of performance. This book builds on a core set of teaching materials developed for the Turning Promises to Evidence workshops organized by the office of the Chief Economist for Human Development HDNCE in partnership with regional units and the Development Economics Research Group DECRG at the World Bank.

Enhancing Agricultural Productivity and Farmer Incomes in Bihar Bhaumik, Sankar Kumar, 2022-11-28. Enhancing Agricultural Productivity and Farmer Incomes in Bihar discusses the performance of Bihar's agriculture sector in recent times and the multifarious challenges it is facing. The book explores future possibilities from the perspectives of raising agricultural productivity and farmer incomes and attaining inclusive growth. Given that doubling farmers' incomes in India is the declared agenda of the central and state governments, the insights to be gained from this book would be invaluable for researchers and policymakers. With more than 90 per cent of the operational holdings in Bihar falling under the marginal category and the average size of a holding being a meagre 0.39 hectares, the viability of the small farming regime in the state is a serious issue. This book will help readers to understand the developmental challenges not only in Bihar but also in other agriculturally backward regions that are largely dominated by small farmers. It will also help researchers to locate areas in which more research needs to be undertaken if accelerated growth of the agriculture sector and sustainable improvement of farmers' incomes are to be ensured.

Social Policy in Post-Apartheid South Africa Ndangwa Noyoo, 2019-11-01. This book critically examines the current social policy in post-apartheid South Africa and proposes an alternative social policy agenda to create a new development pathway for the country. Taking social policy as a vehicle that will facilitate the creation of a new society altogether, namely the Good Society, the author argues for the adoption of policy that will socially re-engineer South Africa. The author shows how the policy tools and development interventions which were undertaken by the post-apartheid state in driving South Africa's transformation agenda failed to emancipate many individuals, families, and

communities from the cycle of intergenerational poverty and underdevelopment He contends that social policy interventions that foster the social re engineering of South African society must take place to untangle the inherited colonial apartheid social order This book includes comparative analyses on the Global South and Global North to present the ways in which countries such as post Second World War Great Britain and Sweden and post independence Zambia of the 1960s and 1970s were able to use social policy to create new societies altogether or places similar to the Good Society The conceptual and methodological issues that form the basis for this book reside in public policy making and the public good and will be of interest to scholars of social policy social development and South African society *The Impact of Corporate Social Responsibility* Robert Kudłak,Ralf Barkemeyer,Lutz Preuss,Anna Heikkinen,2022-08-26 The Impact of Corporate Social Responsibility Corporate Activities the Environment and Society adds to the current debate on the societal level impacts of corporate social responsibility CSR This edited volume offers conceptual and empirical contributions highlighting various dimensions of CSR impacts What differentiates the book from others is that we examine the impact of CSR at the societal level rather than focussing only on those at occur at the level of the firm The book s contributions present novel perspectives that comprise among others empirical analyses of CSR activities accounts of impacts in various geographic locations and state of the art reviews of extant literature on the topic The practical examples and theory building presented here help us to better capture the societal impacts of contemporary CSR practice This book will appeal to scholars and students as well as practitioners and policy makers interested in practical and theoretical aspects of CSR impacts at the societal level Chapter 3 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY 4 0 license Global Forest Carbon Runsheng Yin,2024-03-15 This book addresses the major policy economic and financial issues encountered in global forest carbon The global forest sector is expected to play a major role in achieving the Paris Agreement s temperature targets Therefore there is an urgent need to explore practical and promising solutions to the challenges facing carbon accounting and policy assessment as the global community undertakes forest sector actions including the widely known REDD initiative This book demonstrates how vital it is that we identify appropriate perspectives and formulate approaches to address these challenges in an integrated and effective manner In doing so it addresses many of the major issues including the differential potentials for carbon sequestration within various forest ecosystems as well as for storage within a variety of harvested wood products the joint production of timber and carbon and the measurement and impact of forest carbon offsets and credits results based payments and other nationally determined contributions centered differences as well The book examines regional and country level case studies from across the world and draws on the author s decades of experience working on forest policy and with the forest sector Overall this book highlights the technical and policy issues regarding forest sector carbon emission and removal to build useful perspectives frameworks and methods for addressing these issues successfully in the future It
