Evolving Beyond Thought: Updating Your Brain's Software Gary Weber, 2018-02-24 The seemingly insoluble problems of our species at the current time is our inability to successfully cope with the complexities of our massively complex highly integrated society using our outdated software programs created when we were hunter gatherers This book outlines the problem areas with our current software how to address them demonstrates tools to facilitate this change and then gives a demonstration of how the process unfolds in a dialogue with a successful practitioner of the process and its improved software The first section of the book focuses on a systematic approach to working directly on the problems with the current operating system OS and its programs The process begins by removing our current outdated OS I focused on the I and evaluating the success of the removal An updated OS mini me less focused on the I is then installed from several trusted and reliable sources Next the most problematic programs are removed or significantly modified The second section provides a powerful tool to support this process seemingly exactly tailored to it the Ribhu Gita Sections devoted to Am I these thoughts What is this mind Am I this body What problems arise from this belief that I am this body What am I and then What are the benefits of this knowledge of the Self This text was a the favorite of my main teacher Ramana Maharshi and aligns perfectly with his direct path of self inquiry for nondual awakening It is powerful to read and to chant The third section demonstrates that this self inquiry and letting go of attachments process works in the real world with a real job Through dialogue with someone going through the process over a significant length of time it shows how the process actually unfolds The fourth section focuses on the most problematic strongly held and tenacious of the programs in the current OS I the issues of free will control and predetermination This is the stronghold of the egoic I structure Selected comments questions and answers from blogposts on the issue address resistances objections and problems that arise [Into the Stillness](#) Gary

Responding to the Sacred Michael Bernard-Donals, Kyle Jensen, 2021-03-17 With language we name and define all things and by studying our use of language rhetoricians can provide an account of these things and thus of our lived experience The concept of the sacred however raises the prospect of the existence of phenomena that transcend the human and physical and cannot be expressed fully by language The sacred thus reveals limitations of rhetoric Featuring essays by some of the foremost scholars of rhetoric working today this wide ranging collection of theoretical and methodological studies takes seriously the possibility of the sacred and the challenge it poses to rhetorical inquiry The contributors engage with religious rhetorics Jewish Jesuit Buddhist pagan as well as rationalist scientific and postmodern rhetorics studying for example divination in the Platonic tradition Thomas Hobbes's and Walter Benjamin's accounts of sacred texts the uncanny algorithms of Big Data and H I ne Cixous's sacred passages and passwords From these studies new definitions of the sacred emerge along with new rhetorical practices for engaging with the sacred This book provides insight into the relation of rhetoric and the sacred showing the capacity of rhetoric to study the ineffable but also shedding light on the boundaries between them In addition to the editors the contributors to this volume include Michelle Ballif Jean Bessette Trey Conner Richard Doyle David Frank Daniel M Gross Kevin Hamilton Cynthia Haynes Steven Mailloux James R Martel Jodie Nicotra Ned O Gorman and Brooke Rollins

Scale Theory Joshua DiCaglio, 2021-11-30 A pioneering call for a new understanding of scale across the humanities How is it possible that you are simultaneously cells atoms a body quarks a component in an ecological network a moment in the thermodynamic dispersal of

the sun and an element in the gravitational whirl of galaxies In this way we routinely transform reality into things already outside of direct human experience things we hardly comprehend even as we speak of DNA climate effects toxic molecules and viruses How do we find ourselves with these disorienting layers of scale Enter Scale Theory which provides a foundational theory of scale that explains how scale works the parameters of scalar thinking and how scale refigures reality that teaches us how to think in terms of scale no matter where our interests may lie Joshua DiCaglio takes us on a fascinating journey through six thought experiments that provide clarifying yet provocative definitions for scale and new ways of thinking about classic concepts ranging from unity to identity Because our worldviews and philosophies are largely built on nonscalar experience he then takes us slowly through the ways scale challenges and reconfigures objects subjects and relations Scale Theory is in a sense nondisciplinary weaving together a dizzying array of sciences from nanoscience to ecology with discussions from the humanities from philosophy to rhetoric In the process a curious pattern emerges attempts to face the significance of scale inevitably enter terrain closer to mysticism than science Rather than dismiss this connection DiCaglio examines the reasons for it redefining mysticism in terms of scale and integrating contemplative philosophies into the discussion The result is a powerful account of the implications and challenges of scale attuned to the way scale transforms both reality and ourselves
