Kumar, 2016-07-11 What Are the Basics of the Leptin Diet The Leptin Diet was designed by Byron J Richards a clinical nutritionist and founder of supplement company Wellness Resources It revolves around five primary guidelines Never eat after dinner or within three hours of bedtime Eat three meals a day with five to six hours between every meal Stop eating when you are slightly less than full Get about 20-30 grams of protein at breakfast Reduce but don't completely cut out carbs The Leptin Diet also recommends that people eat about 400-600 calories at each meal with about 30 percent of their calories from carbohydrates 40 percent from protein and 30 percent from fat It prioritizes eating whole organic and minimally processed foods drinking more water and avoiding caloric beverages and those containing artificial sweeteners Soda energy drinks and foods and drinks that contain soy are banned on the diet How Does the Leptin Diet Work The Leptin Diet cuts calories and limits opportunities for overeating or mindless eating which are big problems for most of us But does it do much to promote the normal production of leptin in those with leptin resistance A 2015 study published in BMC Biochemistry revealed that digested wheat gluten can inhibit the binding of leptin to the leptin receptor however more research needs to be done to verify this finding Will you improve your leptin levels by cutting way back on carbs and pumping up the protein at breakfast Probably not but research hasn't completely ruled this out The quality of the food you eat is of course important What is interesting about The Leptin Diet is that it is just as important when you eat as what you eat The Leptin Diet is the secret to getting more energy from less food The scientific principles upon which it is based are unlikely to ever change This is not a fad diet a calorie manipulation scheme or a starvation routine masquerading as a diet It does not involve deprivation of pleasure The underlying principles of The Leptin Diet apply to everyone whether

you need to lose weight or not It is a lifestyle for eating properly grounded in the science of leptin It is something you can do happily and healthfully over the long haul The Five Rules of the The Leptin Diet Rule 1 Never eat after dinner Rule 2 Eat three meals a day Rule 3 Do not eat large meals Rule 4 Eat a breakfast containing protein Rule 5 Reduce the amount of carbohydrates eaten Let s take a look at each of these rules a little more closely Click on BUY BUTTON
