Inside the Harvard Business School David W. Ewing, 1990 Here is the inside story of an intriguing institution offering a unique blend of business stories management tips and interesting character sketches Ewing talks to the top professors and presents their ideas in convenient form Business Strategy J. -C. Spender, 2014-01-31 What is strategy For many it is the application of a theory model or framework In this book Spender develops a different creative approach Emphasizing that firms face uncertainties and unknowns knowledge

gaps he argues that the core of strategic thinking and processes rests on the organization's leaders developing newly imagined solutions to the opportunities that these uncertainties open up. Drawing on a wide range of ideas from strategy, economics, entrepreneurship, and philosophy, he stresses the importance of judgment in strategy and argues that a key element of the entrepreneur and executive's task is to engage chosen uncertainties, develop a language to express and explain the firm's particular business model for dealing with these, and thus create innovation and value. At the same time, he shows how the language the strategist creates to do this gives the firm identity and purpose and communicates this to its members, stakeholders, and customers. In an accessible and engaging style, Spender introduces these ideas and reviews the strategy tools currently available from consultants and academics. Throughout, he stresses the uncertainties or knowledge absences that pervade business and make effective strategizing both necessary and valuable. He outlines a structured practice that managers and consultants might choose to follow, not a theory. With appendices on casework, teaching strategy, current strategy texts, and further reading, this book makes an important contribution to our understanding of the field and practice of strategy, opening up new approaches for managers, consultants, strategy teachers, and students. **Applied Basic Sciences Questions-Answers**
