Body/State Jen Dickinson, 2016-04-08 *Body*

State brings together original essays addressing various aspects of the evolving interaction between bodies and states. While each essay has different empirical and/or theoretical focus, authors consider a number of overlapping themes to appreciate the state's engagement with and concern about bodies. Divided into five parts, the first part, *Bodies Modified and Divided*, considers how the production, regulation, policing, and maintenance of borders—physical, social, sexual, political, religious, etc.—are used to enable or constrain the physical re-shaping of the body. Part two, *Capital Bodies*, extends the state's concern with the flows of bodies that make up the nation to consider how they are enrolled in the complex structures of capitalist exchange that form the basis for maintaining and contesting a set of relationships between states and markets. Part three, *Deviance and Resistance*, examines both how states seek to discipline non-normal bodies and appreciates the capacity of changes in the socio-cultural meaning and nature of bodies to resist and/or escape states. Part four, *Sovereignty and Surveillance*, develops themes of deviancy and resistance by considering the impact of new technologies both on the intimate regulatory reach of states into and across bodies and on the nature of embodiment itself. Finally, Part five, *The Body Virtual*, examines the impact of new technologies and online spaces both on the intimate regulatory reach of states into and across bodies and on the nature of embodiment itself. A varied collection of essays that address important and complex topics in a readable and creative way.

[Futures and Fictions](#) Simon O'Sullivan, Henriette Gunkell, Ayesha Hameed, 2017-11-21 *Futures and Fictions* is a book of essays and conversations that explore possibilities for a different political imaginary or more simply the imagining and imaging of alternate narratives and image worlds that might be pitched against the impasses of our neoliberal present. In particular, the book contributes to prescient discussions around decolonization, post-capitalism, and new kinds of social movements, exploring the intersections of these with contemporary art practice and visual culture. Contributions range from work on science, sonic, and financial fictions, and alternative space-time plots to myths and images generated by marginalized and minor communities, queer feminist strategies of fictioning, and the production of new Afro and other futurisms. Contributors to this volume include Ursula K. Le Guin, Theo Reeves, Evisson, Bridget Crone, Kodwo Eshun, Louis Moreno, Laboria Cuboniks, Luciana Parisi, Stefan Helmreich, Mark Fisher, Judy Thorne, Annett Busch, Harold Offeh, Robin Mackay, Elvira Dyangani Ose, Kemang Wa Lehulere, and Oreet Ashery.

explores the genre's evolution as a popular and even vulgar genre of financialisation characterised by volatile plots centred on currency speculation where the central mystery is money not murder By contextualising the rise of financial thrillers within the dramatic events of the 1970s such as the abolition of the Bretton Woods system and the oil crises this book illustrates how a genre found the world of finance during a particular historical moment but also how the world of finance found its genre This compelling narrative connects the past to our present financial landscape making it essential for anyone interested in the intersection of economic literary and cultural history

On Theory-Fiction and Other Genres Simon O'Sullivan, 2024-11-27 This book looks at three different kinds of writing practice theory fiction autofiction autotheory and art writing that are increasingly prevalent as genres or hybrid genres in the arts and critical humanities The chapters in the book operate as a critical survey of these new forms of writing many examples are listed whilst at the same time they each work towards some provisional definitions Some key precursors to these new genres are also identified The book explores what these new kinds of writing do What is particular to them or what do they add to those already existing styles and genres and especially the academic essay and article Key here is that each form of writing works in a performative manner or as a device that enables a shift in perspective A case is made for their urgency in relation to contemporary issues and concerns and for their importance in terms of being both from and for more marginalised communities The book concludes with a discussion of machine writing and especially our collaboration with artificial intelligence language models

Canadian Art, 2008 **Contested Property Claims** Maja Hojer Bruun, Patrick Joseph Cockburn, Bjarke Skærlund Risager, Mikkel Thorup, 2017-12-01 Property relations are such a common feature of social life that the complexity of the web of laws practices and ideas that allow a property regime to function smoothly are often forgotten But we are quickly reminded of this complexity when conflict over property erupts When social actors confront a

property regime for example by squatting they enact what can be called contested property claims As this book demonstrates these confrontations raise crucial issues of social justice and show the ways in which property conflicts often reflect wider social conflicts Through a series of case studies from across the globe this multidisciplinary anthology brings together works from anthropologists legal scholars and geographers who show how exploring contested property claims offers a privileged window onto how property regimes function as well as an illustration of the many ways that the institution of property shapes power relationships today
