It presents clear explanations on inspection, testing, certification and reporting, test instruments and test methods as well as covering electricity, the law, standards and codes of practice, assessment of general characteristics, protection against electric shock, thermal effects, overcurrent, undervoltage and overvoltage, isolation and switching, the common rules of equipment selection, switchgear, protective devices and other equipment, wiring systems including the external influences on them and cable installation methods, protective conductors, earthing and protective bonding, supplies for safety services, the smaller installation and specialised installations such as outdoor lighting, installations in churches, multi-occupancy blocks of flats. These topics are addressed with pertinent regulation numbers and a useful appendix lists the relevant Standards. Background guidance and worked examples are provided where appropriate.
