

"Rebuilding healthy dependency involves changing how you think about yourself and other people. When your thought patterns change, your feelings will change as well. Your relationship goals will begin to shift—you'll find it easier to reach out for help with confidence and strength.

"But it all starts with changing your mind-set, and that's where we'll begin."

—Authors Robert F. Bornstein, Ph.D., and Mary A. Langrاند, Ph.D., from the preface

ADVANCE PRAISE FOR

Healthy Dependency

Leaning on Others *Without* Losing Yourself

"A truly clear and accessible book that provides solid information, as well as techniques, on the basics of balancing intimacy and autonomy so that it leads to 'healthy dependency.'"

—Harold Cook, Ph.D., Professor Emeritus of Psychology and Education Teachers College, Columbia University, and Founding and Past President of the Psychoanalytic Research Society

"Translating research findings into everyday language and into principles of behavior change, *Healthy Dependency* is an excellent, practical guide to improving interpersonal relations. I immediately began applying this information to myself. There is a very clear description of dependency issues and practical suggestions about changing one's interpersonal style with partners, friends, family, and colleagues. In these difficult times, it is

important to find the right balance between independence and reaching out to others for support. This book helps one find that balance."

—Sandra W. Russ, Ph.D., Professor of Psychology, Case Western Reserve University

"When two psychologists married to one another are able to co-author a book about healthy dependency, you can be sure they know something about it. The alternatives to healthy dependency skew in the direction of detachment or overdependence. This is a real self-help book that demonstrates how to maintain a healthy balance between these two distortions of healthy dependency."

—Ethel Spector Person, M.D., Professor of Clinical Psychiatry, Columbia University, author of *Feeling Strong: The Achievement of Authentic Power*

Doing Exercise Psychology Mark B. Andersen, Stephanie J. Hanrahan, 2015-01-05 According to the President's Council on Fitness Sports Nutrition If exercise could be packaged into a pill it would be the single most widely prescribed and beneficial medicine in the nation Yet the incorporation of physical activity into a regular routine proves difficult for many Bringing together a field of experts Doing Exercise Psychology uses applied theories alongside authentic client interactions to address the challenging psychological components of physical activity Doing Exercise Psychology helps students understand how to build connections with individual clients strengthen the professional relationship through listening and understand clients' needs The text features diverse topics bridging health psychology and exercise psychology and demonstrating the increasingly important role of physical activity in overall wellness and health The first chapter is devoted to the development of mindfulness as a practitioner while another addresses the difficulties professionals encounter with their own inactivity encouraging self reflection in order to be more helpful and open with clients A key feature of many chapters in Doing Exercise Psychology is the in the trenches dialogue between practitioner and client accompanied by follow up commentary on what went right and what went wrong in particular sessions Through these real world scenarios students will witness firsthand the methods that are most effective in communicating with clients The text also explores complex questions such as these What are the implications and consequences of using exercise as a component of psychological therapies How can practitioners help

clients with impaired movement abilities as a result of chronic conditions or illness embrace physical activity as part of their therapy or their lives How can exercise be incorporated in therapies to change nutrition smoking and alcohol habits Why are some exercise protocols that are extremely effective for some but not for others How can relationships interrelatedness and attunement to others be vehicles for healthy change in whatever kind of therapy is being done The book is arranged so that information flows progressively covering major themes early and then applying them to the field Part I introduces the relationship building motif by covering the variety of relationships that one might find in exercise and physical activity settings Part II addresses specific conditions and behavior change with suggestions for encouraging activity in those who are also working to quit smoking reduce alcohol consumption or modify their nutrition habits Part III deals directly with chronic and major medical conditions that professionals will contend with on a regular basis including cancer heart disease and multiple sclerosis Part IV delves into the dark side of exercise such as overtraining exercise dependence and eating disorders A growing and exciting area of study exercise psychology covers all the psychosocial intra and interpersonal and cultural variables that come into play when people get together and exercise Students and practitioners who work with individuals in exercise settings will find *Doing Exercise Psychology* a vital resource to refer to repeatedly in their practice

Self-esteem and Adjusting with Blindness Dean W. Tuttle, Naomi R. Tuttle, 2004 This new and expanded Third Edition analyzes blindness within the context of two overlapping theoretical constructs the development of self esteem and the process of adjusting to social and or physical trauma The book is divided into four sections The first section provides an overview of blindness and the essential background for subsequent discussions Section II explores the general theoretical model for the development of self esteem common to all persons and analyzes the impact that blindness imposes upon this model Section III explores the process of coping with social and physical traumas or crises Section IV is addressed primarily to members of the blind person s support team and provides suggestions for creating a climate for optimum development Factors that may influence the adjustment process descriptions of external and internal sources of self esteem activities for stimulating affective growth and guidelines for professionals who work with the blind are included Personal impacts and psychosocial implications of blindness are discussed in depth and illustrated with biographical and autobiographical statements by more than 50 blind men and women This book will serve as an excellent review and refresher for experienced practitioners and administrators working in the field of blindness Professionals in education social work vocational counseling rehabilitation recreation therapy ophthalmology and optometry will find this comprehensive resource to be an invaluable addition to their libraries
