The practical manual helps students to gain in-depth knowledge of providing professional services like handling of prescriptions, preparation of dispensing and auxiliary labels, health screening services, administration techniques of various dosage forms and use of community pharmacy software for the betterment of the community health. This manual is designed for outcome-based education and each experiment is arranged in a uniform way such as practical significance, practical outcomes, PROs and its mapping with course outcomes, minimum theoretical background, resources used, procedure, precautions, observations, result, conclusion, references and related questions. Moreover, an assessment scheme is also given to help the student and teacher to know what is to be assessed. Every experiment has the component of activity or role play included so that the students will be able to interact with the patients and give them the counselling tips on administration, proper use and storage of the dosage forms. The preparation of counselling materials such as patient information leaflets is also included as an activity. We acknowledge the help and cooperation extended by various persons in bringing out this manual. We are highly indebted to the authors of various books and articles mentioned in references of each experiment which became a major source of information for writing this manual. We also admire the publishers, designers and printers who graciously worked hard to publish this manual.
