Macroeconomics is in disarray No one approach is dominant and an increasing divide between theory and empirics is evident This book presents both a critique of mainstream macroeconomics from a structuralist perspective and an exposition of modern structuralist approaches The fundamental assumption of structuralism is that it is impossible to understand a macroeconomy without understanding its major institutions and distributive relationships across productive sectors and social groups Lance Taylor focuses his critique on mainstream monetarist new classical new Keynesian and growth models He examines them from a historical perspective tracing monetarism from its eighteenth century roots and comparing current monetarist and new classical models with those of the post Wicksellian pre Keynesian generation of macroeconomists He contrasts the new Keynesian vision with Keynes s General Theory and analyzes contemporary growth theories against long traditions of thought about economic development and structural change Table of Contents Acknowledgments Introduction 1 Social Accounts and Social Relations 1 A Simple Social Accounting Matrix 2 Implications of the Accounts 3 Disaggregating Effective Demand 4 A More Realistic SAM 5 Stock Flow Relationships 6 A SAM and Asset Accounts for the United States 7 Further Thoughts 2 Prices and Distribution 1 Classical Macroeconomics 2 Classical Theories of Price and Distribution 3 Neoclassical Cost Based Prices 4 Hat Calculus Measuring Productivity Growth and Full Employment Equilibrium 5 Mark up Pricing in the Product Market 6 Efficiency Wages for Labor 7 New Keynesian Crosses and Methodological Reservations 8
