

Chapter 2 Guided Reading Activity

Section 2.1

<https://open.lib.umn.edu/sociology/chapter/2-1-sociology-as-a-social-science/>

Read through the section and answer the following questions. You must highlight your responses

1. When we say that sociology is a social science, we mean that it uses the **Scientific Method** to try to understand the many aspects of society that sociologists study.
2. An important goal is to yield **Generalizations**—general statements regarding trends among various dimensions of social life.
 - a. Stereotypes
 - b. **Generalizations**
 - c. Common sense
 - d. Personal experiences
3. Why is sociology so different from other social sciences like physics? **Sociology is different from other social sciences because Sociology can help us understand the social forces that affect our behavior, beliefs, and life chances, but it can only go so far. Physics is more like science because it teaches us about how the universe behaves.**
4. List the 5 sources where individuals get their knowledge: **Social Media, Personal Experience, the Scientific Method, Traditions, Expert Authorities.**
5. Although personal experiences are very important, not everyone has the **same** personal experience.
6. Why is common sense not a reliable source of knowledge?
 - a. **Not everyone has it**
 - b. It varies from culture to culture
 - c. It can contradict itself
 - d. Only women have it (actually, this could be right...)
7. What are the two issues with the way the media covers topics and news? **You don't even know if it's fake or real. So many media pages and News are sometimes fake news or false information to make u think a certain way.** Expert authorities, such as **teachers, parents,** and government officials, are a fourth source that influences our understanding of social reality.
8. Why can't individuals always trust "expert authorities"? They can't trust "expert authorities" because the evidence may not be updated to the fullest or it can also be false. Tradition is generally valuable, because a society should always be aware of its **Roots**. However, traditional ways of thinking about social reality often turn out to be **inaccurate** and **incomplete**.
9. The scientific method is followed in the natural, physical, and social sciences to help yield the most **accurate** and reliable conclusions possible, especially ones that are free of **bias** or methodological errors.
10. Which of the following is NOT one of the four steps in the scientific method?
 - a. Formulating a theory
 - b. Measuring and gathering data
 - c. Analyzing data
 - d. **Publishing your research**

you're an instructor, student, or professional looking to boost your skill set. Each chapter includes a set of review questions as well as practical hands-on lab exercises. Learn the requirements for deploying packetized voice and video. Understand traditional telephony concepts including local loop, tip and ring, and T-carriers. Explore the Session Initiation Protocol (SIP), VoIP's primary signaling protocol. Learn the operations and fields for VoIP's standardized RTP and RTCP transport protocols. Delve into voice and video codecs for converting analog data to digital format for transmission. Get familiar with Communications Systems H.323, SIP's widely used predecessor. Examine the Skinny Client Control Protocol used in Cisco VoIP phones in networks around the world. **Materials** Michael F. Ashby, Hugh Shercliff, David Cebon, 2018-11-27

Materials Engineering: Science, Processing, and Design is the essential materials engineering text and resource for students developing skills and understanding of materials properties and selection for engineering applications. Taking a unique design-led approach that is broader in scope than other texts, *Materials* meets the curriculum needs of a wide variety of courses in the materials and design field, including introduction to materials science and engineering, engineering materials, materials selection, and processing and behavior of materials. This new edition retains its design-led focus and strong emphasis on visual communication while expanding its coverage of the physical basis of material properties and process selection. Design-led approach motivates and engages students in the study of materials science and engineering through real-life case studies and illustrative applications. Highly visual, full-color graphics facilitate understanding of materials concepts and properties. Chapters on materials selection and design are integrated with chapters on materials fundamentals, enabling students to see how specific fundamentals can be important to the design process. For instructors, a solutions manual, lecture slides, and image bank are available at <https://educate.elsevier.com/book/details/9780081023761>. Links to Granta EduPack sample data sheets: <https://www.grantadesign.com/education/ces-edupack-granta-edupack-data-ces-edupack-sample-datasheets> for information. New to this edition: Expansion of the atomic basis of properties and the distinction between bonding-sensitive and microstructure-sensitive properties. Process selection extended to include a structured approach to managing the expert knowledge of how materials processes and design interact, with an introduction to additive manufacturing. Coverage of materials and the environment has been updated with a new section on Sustainability and Sustainable Technology. Text and figures have been revised and updated throughout. The number of worked examples and end-of-chapter problems has been significantly increased. **SAT Subject Test: Latin** Ronald B. Palma, 2012-05-28 Taking the SAT Latin Subject Test.
