## **Kharkov 1942 The Wehrmacht Strikes Back Campaign:**

Kharkov 1942 Robert Forczyk, 2013-04-20 After failing to finish off the German Army in the 1941-42 Winter Counteroffensive Stalin directed the Red Army to conduct a powerful blow in one sector of the Eastern Front in order to disrupt German plans. The sector chosen was Kharkov. Under Marshal Semyon Timoshenko the Stavka's remaining reserves were assembled and prepared to conduct a breakthrough attack intended to encircle the German Sixth Army near Kharkov. However, Stalin was unaware that the Germans were planning their own riposte at Kharkov known as Operation Fredericus. When Timoshenko began his offensive in May 1942, he did not realize the limitations of his own forces or the agility of the Germans to recover from setbacks, all of which contributed to one of the Red Army's greatest defeats of World War II. This volume will pay particular attention to intelligence and logistics issues as well as how this campaign served as a prelude to the battle of Stalingrad. It will also focus on the nascent development of the Red Army's tank corps and deep battle tactics as well as the revival of the German Panzertruppen after Barbarossa.

**Stalingrad 1942-43 (1)** Robert Forczyk, 2021-01-21 The first in a three-book series examining the Stalingrad campaign, one of the most decisive military operations in World War II that set the stage for the ultimate defeat of the Third Reich. After failing to defeat the Soviet Union with Operation Barbarossa in 1941, Adolf Hitler planned a new campaign for the summer of 1942 that was intended to achieve a decisive victory. Operation Blue Case Blau. In this new campaign, Hitler directed that one army group, Heeresgruppe A, would advance to seize the Soviet oilfields in the Caucasus while the other, Heeresgruppe B, pushed on to the Volga River. The expectation was for a rapid victory; instead, German forces had to fight hard just to reach the outskirts of Stalingrad and then found themselves embroiled in a protracted urban battle amid the ruins of a devastated city on the Volga. The Soviet Red Army was hit hard by the initial German offensive but held onto the city and then launched Operation Uranus, a winter counteroffensive that encircled the German 6th Army at Stalingrad. Despite a desperate German relief operation, the Red Army eventually crushed the German forces and

hurled the remnants of the German southern front back in disorder This first volume in the Stalingrad trilogy covers the period from 28 June to 11 September 1942 including operations around Voronezh The fighting in the Don Bend which lasted weeks comprised some of the largest tank battles of World War II involving more armour than the tanks employed at Prokhorovka in 1943 *Bolt Action: Campaign: Case Blue* Warlord Games,2023-10-26 A supplement for the award winning World War II wargame Bolt Action focusing on the Axis offensives through Eastern Ukraine and into the North Caucasus After the failure of Barbarossa to utterly defeat the Soviet Union a new plan was devised Case Blue This plan involved pushing through the southern Soviet Union to reach the Caucasus and secure the oil fields that Germany so desperately needed While initially there was great success and sweeping advances as the autumn began the Axis advances began to falter in the wake of Soviet resistance and counter attacks culminating in the battles in and around Stalingrad This Campaign Book for Bolt Action contains new linked scenarios rules troop types and Theatre Selectors providing plenty of options for novice and veteran players alike The Dnepr 1943 Robert Forczyk,2016-03-24 Against the wishes of Hitler German forces under Erich von Manstein were forced to retreat following the failure of the Kursk offensive of July 1943 The weakened force only had one possible refuge behind the wide Dnepr River The race to the natural defensive line was on with the Soviets launching one of their largest offensives of the war with over 2 million men on the move Expert Eastern Front historian Robert Forczyk describes the dramatic four month campaign that saw the Red Army not only succeed in crossing the Dnepr at multiple points but also liberate Kiev capital of the Ukraine Revealing new detail about the largest Soviet airborne operation of the war and the increasingly desperate delaying tactics employed by Manstein as catastrophic casualties mounted on both sides Forczyk charts the course of the battle that confirmed to many observers that the relentless Soviet advance westward could not be halted Berlin would be next

**Soviet Cavalry Operations During the Second World War** John S. Harrel,2019-09-30 The author of *The Nisibis War* analyzes the Red Army's usage of horse mounted units along the Soviet German Eastern Front during World War II While the development of tanks had largely led to the replacement of cavalry in most armies by 1939 the Soviets retained a strong mounted arm In the terrain and conditions of the Eastern Front they were able to play an important role denied them elsewhere John Harrel shows how the Soviets developed a doctrine of deep penetration using cavalry formations to strike into the Axis rear disrupting logistics and lines of communication encircling and isolating units Interestingly he also shows that this doctrine did not stem from the native cavalry tradition of the steppe but from the example of the American Civil War The American approach was copied by the Russians in WWI and the Russian Civil War refined by the Soviets in the early stages of World War Two and perfected during the last two years of the war The Soviet experience demonstrated that deep operations cavalry raids against enemy rear echelons set the conditions for victory Although the last horse mounted units disappeared in the 1950s their influence led directly to the formation of the Operational Manoeuvre Groups that ironically faced U S forces in the Cold War An expansive analysis of the

technical tactical and operational employment of Soviet cavalry against the Germans and their Axis allies For practitioners who want to understand the history and development the book is a goldmine of overlooked campaigns and actions The book s dense and detailed presentation makes it valuable to operational planners and those interested in the Soviet German war

ARMOR Magazine Kursk 1943 Robert Forczyk,2017-03-21 Mauled at Stalingrad the German army looked to regain the initiative on the Eastern Front with a huge offensive launched near the city of Kursk 280 miles south west of Moscow Armed with the new Panther tank Hitler and Field Marshal von Manstein were confident that they could inflict another crushing defeat on the Soviet Union What they did not know is that the Soviets knew about the coming attack and they were ready This book focuses on the southern front of this campaign which featured one of the biggest clash of armour of the war in the battle of Prokhorovka which involved over a thousand tanks It examines in detail the tactics and mistakes of the army commanders as they orchestrated one of the bloodiest battles in World War II Using campaign maps stunning photographs and vivid artwork this new study a companion to Campaign 272 Kursk 1943 The Northern Front examines whether that the German offensive was doomed from the start as it takes the reader through this titanic clash of armour *Death of the Wehrmacht* Robert M. Citino,2007-10-22 For Hitler and the German military 1942 was a key turning point of World War II as an overstretched but still lethal Wehrmacht replaced brilliant victories and huge territorial gains with stalemates and strategic retreats In this major reevaluation of that crucial year Robert Citino shows that the German army s emerging woes were rooted as much in its addiction to the war of movement attempts to smash the enemy in short and lively campaigns as they were in Hitler s deeply flawed management of the war From the overwhelming operational victories at Kerch and Kharkov in May to the catastrophic defeats at El Alamein and Stalingrad *Death of the Wehrmacht* offers an eye opening new view of that decisive year Building upon his widely respected critique in *The German Way of War* Citino shows how the campaigns of 1942 fit within the centuries old patterns of Prussian German warmaking and ultimately doomed Hitler s expansionist ambitions He examines every major campaign and battle in the Russian and North African theaters throughout the year to assess how a military geared to quick and decisive victories coped when the tide turned against it Citino also reconstructs the German generals view of the war and illuminates the multiple contingencies that might have produced more favorable results In addition he cites the fatal extreme aggressiveness of German commanders like Erwin Rommel and assesses how the German system of command and its commitment to the independence of subordinate commanders suffered under the thumb of Hitler and chief of staff General Franz Halder More than the turning point of a war 1942 marked the death of a very old and traditional pattern of warmaking with the classic German way of war unable to meet the challenges of the twentieth century Blending masterly research with a gripping narrative Citino s remarkable work provides a fresh and revealing look at how one of history s most powerful armies began to founder in its quest for world domination **The Wehrmacht Retreats** Robert M. Citino,2016-09-16 Throughout 1943 the German army heirs to a military tradition that

demanded and perfected relentless offensive operations succumbed to the realities of its own overreach and the demands of twentieth century industrialized warfare In his new study prizewinning author Robert Citino chronicles this weakening Wehrmacht now fighting desperately on the defensive but still remarkably dangerous and lethal Drawing on his impeccable command of German language sources Citino offers fresh vivid and detailed treatments of key campaigns during this fateful year the Allied landings in North Africa General von Manstein s great counterstroke in front of Kharkov the German attack at Kasserine Pass the titanic engagement of tanks and men at Kursk the Soviet counteroffensives at Orel and Belgorod and the Allied landings in Sicily and Italy Through these events he reveals how a military establishment historically configured for violent aggression reacted when the tables were turned how German commanders viewed their newest enemy the U S Army after brutal fighting against the British and Soviets and why despite their superiority in materiel and manpower the Allies were unable to turn 1943 into a much more decisive year Applying the keen operational analysis for which he is so highly regarded Citino contends that virtually every flawed German decision to defend Tunis to attack at Kursk and then call off the offensive to abandon Sicily to defend Italy high up the boot and then down much closer to the toe had strong supporters among the army s officer corps He looks at all of these engagements from the perspective of each combatant nation and also establishes beyond a shadow of a doubt the synergistic interplay between the fronts Ultimately Citino produces a grim portrait of the German officer corps dispelling the longstanding tendency to blame every bad decision on Hitler Filled with telling vignettes and sharp portraits and copiously documented *The Wehrmacht Retreats* is a dramatic and fast paced narrative that will engage military historians and general readers alike      *Summary of Paul Kennedy's Engineers of Victory*

Everest Media,2022-07-24T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The Battle of the Atlantic was the name given to the conflict between Germany and the Allies over the transportation of supplies and troops throughout World War II It was a battle between men aided by all the instruments and devices science could provide but still one that would be decided by the skill and endurance of men 2 The weather in the North Atlantic was as violent as any experienced sailor could remember in midwinter 1943 Because of this the regular convoy traffic fell away at this time 3 The Battle of the Atlantic in 1942 was the most serious crisis the Allies faced The Allied merchant fleets had lost 7 8 million tons in 1942 almost 6 3 million of which was due to the U boat The American mass production shipyards were still gearing up to full strength but their output in 1942 was only 7 million tons which meant that total available Allied shipping capacity had decreased 4 The losses of Allied merchant ships in March and April 1943 were alarming and it seemed that the Germans were having more success at sinking Allied merchant ships than the Allies were in sinking U boats      **Arms and the Man** ,2011-05-10 These essays honor Dennis Showalter a pioneer in the field of military history and a mentor to an entire generation of scholars The essays themselves are written by some of the best known and most highly respected scholars in the field They span the globe and cover a wide range of military history topics from the ancient world to the
