To understand what electricity
is we have to look at the
Composition of matter.
All matter is composed of
Microscopic particles called
Atoms. But each atom is itself
Made up of even smaller particles.
In the centre of each atom there is
A nucleus made up of protons and
Neutrons. Other particles, called
Electrons, spin around the nucleus.

Per capire cos'è l'elettricità
dobbiamo dare uno sguardo
Alla composizione della materia.
Tutta la materia è composta da
particelle microscopiche chiamate
atomi. Ma ogni atomo è costituito
A sua volta da particelle ancora più
piccole. Nel centro di ogni atomo è
presente un nucleo costituito da
protoni e neutroni. Altre particelle
Chiamate elettroni, girano attorno
Al nucleo.

Grammar And Translation For Italian Libretto:

Grammar and Translation for the Italian Libretto Richard M. Berrong, 1996 Finally a complete Italian grammar course that addresses the specific needs of singers translating opera librettos with their archaic forms and poetic syntax In Grammar and Translation for the Italian Libretto Professor Berrong guides you through examples from numerous librettos as you build your expertise Each chapter includes a short vocabulary list and translation exercises to self test You will be empowered to speak and understand Italian more masterfully and to translate Italian opera without having to depend on others to do it for you

Translation and Music Sebnem Susam-Sarajeva, 2016-04-08 Popular and multimodal forms of cultural products are becoming increasingly visible within translation studies research Interest in translation and music however has so far been relatively limited mainly because translation of musical material has been considered somewhat outside the limits of translation studies as traditionally conceived Difficulties associated with issues such as the musicality of lyrics the fuzzy boundaries between translation adaptation and rewriting and the pervasiveness of covert or unacknowledged translations of musical elements in a variety of settings have generally limited the research in this area to overt and canonized translations such as those done for the opera Yet the intersection of translation and music can be a fascinating field to explore and one which can enrich our understanding of what translation is and how it relates to other forms of expression This special issue is an attempt to open up the field of translation and music to a wider audience within translation studies and to an extent within musicology and cultural studies The volume includes contributions from a wide range of musical genres and languages from those that investigate translation and code switching in North African rap and rai and the intertextual and intersemiotic translations revolving around Mahler's lieder in Chinese to the appropriation and after life of Kurdish folk songs in Turkish and the emergence of rock n roll in Russian Other papers examine the reception of Anglo American stage musicals and musical films in Italy and Spain the concept of singability with examples from Scandinavian languages and the French dubbing of musical episodes of TV series The volume also offers an annotated bibliography on opera translation and a general bibliography on translation and music
