The Present Word. Culture, Society and the Site of Literature John Walker, 2017-12-02 This book addresses three key areas of intellectual enquiry literary criticism cultural critique and philosophical theology Once closely related especially in the Catholic tradition they often appear to be separate and unconnected domains in the modern university The work of Nicholas Boyle is one of the most significant recent attempts to reconnect them Responding to that initiative The Present Word challenges this fragmentation of knowledge Several of the essays reflect a major change of emphasis in literary studies over the last two decades the reconnection of an idea of literary criticism closely related to the experience of reading and the wider societal and political concerns addressed by Cultural Studies Contributors also debate from both perspectives whether theological concepts can illuminate the secular culture in which literature is written and read John Walker is Senior Lecturer

in German at Birkbeck College London where he served as Head of the School of Languages Linguistics and Culture from 2006-2009 Angel Planells' Art and the Surrealist Canon Anna Vives, 2019-08-20 Having been mistakenly perceived as a follower of Salvador Dalí, Catalan surrealist painter and writer Angel Planells (1901-1989) has passed through the history of art practically unnoticed. Yet his work suggests an influence on a number of works by Dalí, proving that a fairer way to define their relationship is as an artistic dialogue. His participation in the groundbreaking International Surrealist Exhibition in London in 1936 is in itself a marker of his quality as an artist, but Planells' contribution to surrealism is remarkable for his use of astronomy, fantastic scenes redolent of Edgar Allan Poe's narrative, as well as ludic elements and meta-pictorial techniques that contest Fascism.

The Cosmopolitan Ideal Sybille De La Rosa, Darren O'Byrne, 2015-05-28 Cosmopolitanism has resurfaced as a prominent perspective within philosophy and the social sciences. Its critics, though, suggest that contemporary cosmopolitanism is abstract and ultimately meaningless, or that it is the globalized expression of a very European and modern ideal. This book aims to develop a new cosmopolitanism, one that is critical, inclusive, and relevant for the twenty-first century. The first section considers why we should behave as cosmopolitans at all; why do we owe some concept of justice to those who are suffering some form of injustice around the world? The book then moves beyond normative debates, using empirical studies on practical concerns to explore the ways in which we can break with traditional structures, practices, and power inequalities that have been based on disregard and subordination. Extending the scope of cosmopolitanism to incorporate issues such as gender, asylum, and identity, to draw on non-Western as well as Western influences, the book re-conceptualizes terms like democracy, refuge, and representation in order to develop more inclusive and cosmopolitan understandings of them.

Discourse, 2011 Calvin's Salvation in Writing William A. Wright, 2015-04-14 Academic writing is not a neutral medium for conveying truth; its powers and faults must be exposed before theology entrusts its mysteries to the academic text. To that end, William Wright, en route to putting Calvin's *Salvation in Writing*, institutes a new theological genre: theography, theology that confesses its academic parameters with both gratitude and repentance. He delineates those parameters by contrasting the philosophical rationales for writing found in Hegel and Derrida. Drawing on their insights into dialectic and difference, Wright sets out Calvin's doctrine of justification and sanctification across a shifting written terrain. Observing Calvin's doctrinal structure thus becomes a path to save academic writing from claiming for itself either too much

or too little Calvin's *Salvation in Writing* A Confessional Academic Theology is the philosophically boldest employment of Calvin to date Through innovatively mining Calvin's theology William Wright designs a new method of theology that will enliven the field

Deconstructing Bret Easton Ellis Annette Schimmelpfennig, 2021-09-07 Riddled with intertextual references and notorious for their explicit portrayal of sex drugs and the occasional rock n roll the novels of Bret Easton Ellis reveal many layers The novels are often accused of not making sense but they instead make many senses Their semantic complexity is obvious when put under a theoretical lens as provided by Jacques Derrida His semiotic analysis which focuses on the instability of meaning and is shaped by key terms such as difference the trace and the supplement offers the ideal framework to look behind Ellis's obsession with surfaces Aimed at aficionados of Ellis's works as well as students of contemporary American fiction and literary theory this book discusses the central issues in Ellis's novels through 2019 and offers a new perspective for the practical use of Derrida's ideas In order to ensure accessibility a theoretical chapter introduces all the concepts necessary to understand a Derridean analysis of Ellis's fiction As Rip says in *Imperial Bedrooms* It means so many things Clay

Printing Religion after the Enlightenment Timothy Stanley, 2022-07-26 Over the course of the seventeenth to eighteenth centuries an interior private notion of religion gained wide public recognition It then spread through settler colonial contexts around the world It has since been criticized for its abstract immaterial nature as well as its irrelevance to traditions beyond the European context However such critiques obscure the contradiction between religion's definition as a matter of interior privacy and its public visibility in various printed publications Timothy Stanley responds by re-evaluating the cultural impact of the exterior forms in which religious texts were printed such as pamphlets broadsheets books and journals He also applies that evidence to critical studies of religion shaped by the crisis of representation in the human sciences While Jacques Derrida is oft cited as a progenitor of that crisis the opposite case is made Additionally Stanley draws

on Derrida's thought to reframe the relation between a religious text's internal hermeneutic interests and its external forms. In sum, this book provides a new model of how people printed religion in ways that can be compared to other material cultures around the world. **Bookforum**, 2001

Globalization and the Posthuman William S. Haney II, 2009-03-26

Globalization and the Posthuman argues that by globalizing posthumanism through biotechnology, particularly through the invasive interface of humans and machines, we may well interfere with and even undermine the innate quality of human psycho physiology and the experience of the internal observer, the non-socially constructed self or pure consciousness. Furthermore, many features of globalization in and of itself, such as the fall of public man, the exterritorialization of capital, the loss of an impersonal public world to localized communities based on emotively shared interests, combined with the posthuman expansion of biotechnology, will diminish our natural capacity to experience the self as knower and lead to an increase in global crime, sickness, accident rates, and overall lack of harmony. The experience of the self comprises the unsayable secret of modern and postmodern literature and art, a secret that may soon become inaccessible if the world continues down the road of globalized infomania. The analysis of the consequences of globalization and the posthuman in this book is unique in that it will be the first to examine the interrelation between globalization, posthumanism, and pure consciousness. Posthumanists define consciousness in a way that promotes the globalization of biotechnology without regard for its potential risks. This book explores the implications of the globalization of the posthuman model of consciousness. On the one hand, cognitive scientists tend to equate consciousness with subjectivity, which they associate with the thinking mind as an extension of the body, nature, and culture. Eastern philosophy, on the other hand, distinguishes mind from consciousness, with mind defined as the content of consciousness. Bionic technology will have the effect of raising human metabolism and preventing the mind from settling down to the state of least excitation of consciousness. This book suggests that while conscious content is an indispensable aspect of both the human and posthuman condition, the thoughts, memories, feelings, and perceptions of this content do not encompass a vital aspect of human nature, attested to not only by the first-person experience of many millions of people around the world but also by the records of both classical and modern contemplative traditions.
