**InfoWorld**, 2003-04-07 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects

Information Infrastructure Systems for Manufacturing Jan Goossenaerts, Johan C. Wortmann, Fumihiko Kimura, 2013-06-05 On the verge of the global information society enterprises are competing for markets that are becoming global and driven by customer demand and where growing specialisation is pushing them to focus on core competencies and look for partnerships to provide products and services Simultaneously the public demands environmentally sustainable industries and urges manufacturers to mind the whole life span of their products and production resources Information infrastructure systems are anticipated to offer services enabling and catalyzing the strategies of manufacturing companies responding to these challenges they support the formation of extended enterprises the mastering of full product and process life cycles and the digitalization of the development process Information infrastructure systems would accommodate access to and transformation of information as required by the various authorized stakeholders involved in the life phases of products or production resources Services should be available to select and present all relevant information for situations involving any kind of players during any life phase of a product or artifact at any moment and at any place

BIM and Quantity Surveying Steve Pittard, Peter Sell, 2017-07-14 The sudden arrival of Building Information Modelling BIM as a key part of the building industry is redefining the roles and working practices of its stakeholders Many clients designers contractors quantity surveyors and building managers are still finding their feet in an industry where BIM compliance can bring great rewards This guide is designed to help quantity surveying practitioners and students understand what BIM means for them and how they should prepare to work successfully on BIM compliant projects The case studies show how firms at the forefront of this technology have integrated core quantity surveying responsibilities like cost estimating tendering and development appraisal into high profile BIM projects In addition to this the implications for project management facilities management contract administration and dispute resolution are also explored through case studies making this a highly valuable guide for those in a range of construction project management roles Featuring a chapter

describing how the role of the quantity surveyor is likely to permanently shift as a result of this development as well as descriptions of tools used this covers both the organisational and practical aspects of a crucial topic **Managing Information Technology in a Global Economy** Information Resources Management Association.
