OOP Demystified Jim Keogh,Mario Giannini,2004-03-29 Learn object oriented programming in no time with help from this easy to understand guide ideal for novice and expert programmers alike Discover why objects are so successful as the model for this type of programming and how objects are classified Distinguish between how people see the world and how computers see it Learn about attributes and methods inheritance polymorphism real world and case modeling object oriented programming languages and much more Each chapter ends with a quiz culminating in a final exam at the end of the book so you can test your knowledge On The Move to Meaningful Internet Systems 2003: OTM 2003 Workshops R.

Meersman,Zahir Tari,2003-10-30 This book constitutes the joint refereed proceedings of six international workshops held as part of OTM 2003 in Catania Sicily Italy in November 2003 The 80 revised full workshop papers presented together with various abstracts and summaries were carefully reviewed and selected from a total of 170 submissions In accordance with the workshops the papers are organized in topical main sections on industrial issues human computer interface for the semantic Web and Web applications Java technologies for real time and embedded systems regulatory ontologies and the modelling of complaint regulations metadata for security and reliable and secure middleware **On The Move to Meaningful Internet Systems 2003: OTM 2003 Workshops** Zahir Tari,2003-10-25 missions in fact also treat an envisaged mutual impact among them As for the 2002 edition in Irvine the organizers wanted to stimulate this cross pollination with a program of shared famous keynote speakers this year we got Sycara ble Soley and Mylopoulos and encouraged multiple attendance by providing authors with free access to another conference or workshop of their choice We received an even larger number of submissions than last year for the three conferences 360 in total and the workshops 170 in total Not only can we therefore again claim a measurable success in attracting a representative volume of scientific papers but such a harvest allowed the program committees of course to compose a high quality cross section of worldwide research in the areas covered In spite of the increased number of submissions the Program Chairs of the three main conferences decided to accept only approximately the same number of papers for presentation and publication as in 2002 i e around 1 paper out of every 4 5 submitted For the workshops the acceptance rate was about 1 in 2 Also for this reason we decided to separate the proceedings into two volumes with their own titles and we are grateful to Springer Verlag for their collaboration

in producing these two books The reviewing process by the respective program committees was very professional and each paper in the main conferences was reviewed by at least three referees
