Heat Treating, Including Steel Heat Treating In the New Millennium Sandra J. Midea, 2000-01-01 Papers from a November 1999 meeting examine heat treating and associated industries touching on aspects of control of microstructure through heat treatment equipment and processes forge heating with induction

quenching and distortion and steel heat treating in the new millennium Subjects inclu The Journal of the Chemical, Metallurgical & Mining Society of South Africa ,1915 **Computer Programming Examples for Chemical Engineers**
George Ross,1987 Written by a chemical engineer rather than by a computer scientist this book fills the gap between texts which teach computer languages or programming methods and chemical engineering texts which omit details of writing programs In order to write a computer program and get it to work general theoretical principles are not enough one has to actually do the job This is done in each case by first taking the reader through a manual calculation then presenting a computer program to perform the same task Explanation of how the program operates is given in some detail Topics discussed in this way include computer flowsheeting interpretation and accessing of results and physical data forward feed multi effect evaporation binary distillation linear programming introduction to finite differences with simple heat exchanger example steady state multi dimensional heat conduction unsteady state heat conduction solution of automatic control problems using finite differences In each case the necessary theory is fully introduced The programs are written in BASIC an easily learnt moderately powerful language available on both mainframe and desk top computers
