Masterpieces Performance Architecture Design:

Performance Architecture + Design Chris van Uffelen, 2010 Theaters concert halls and opera houses are among the most fascinating architectural tasks of today Large metropolises as well as medium sized and smaller communities are enhancing their cultural infrastructure with spectacular new buildings and renovated historical structures for the performing arts As prestige projects buildings are emerging that first of all offer compelling designs and functions but also shape and enrich their settings as outstanding individual structures Masterpieces Performance Architecture Design presents 69 contemporary international projects by famous architects and up and coming young designers The diversity and creativity of the projects are presented in depth through high quality images and plans coupled with informative texts The Environmental Performance of Tall Buildings Joana Carla Soares Goncalves, 2010-09-23 Tall buildings represent one of the most energy intensive architectural typologies while at the same time offering the high density work and living conditions that many believe will be an important constituent of future sustainable communities How then can their environmental impact be lessened This insightful book takes in an overview of the tall building and its impacts looking at cityscape place mobility microclimate energy and economics design principles and the development of the sustainable tall building global perspectives covering North and South America Europe the Middle East and Asia detailed qualitative case studies of buildings in design and operation the future for sustainable tall buildings Not simply another showcase for future utopian designs and ideals the information presented here is based on hard research from operating buildings Highly illustrated and combining analysis with solid detail for practice this is essential reading for architects building engineers design consultants retrofitters and urban planners interested in or working with tall buildings and researchers students in these disciplines

Person-Environment Psychology W. Bruce Walsh, Kenneth H. Craik, Richard H. Price, 2000-05 A variety of theoretical approaches to person environment psychology has been developed over the years representing a rich range of intellectual perspectives This second edition links the past and present and looks toward the future in reviewing new directions and perspectives in person environment psychology Stated differently the main thrust of this volume is to present contemporary models and perspectives that make some sensible predictions concerning the individual and the environment using the person environment relationship Within a person environment framework these models and perspectives are concerned with how people tend to influence environments and how environments reciprocally tend to influence people Thus this second edition presents new directions in person environment psychology and the implications for theory research and application

The Routledge Handbook of Architecture, Urban Space and Politics, Volume II Nikolina Bobic, Farzaneh Haghighi, 2024-11-22 Architecture and the urban are connected to challenges around violence security race and ideology spectacle and data The first volume of this handbook extensively explored these oppressive roles This second volume illustrates that escaping the corporatized and bureaucratized orders of power techno managerial and consumer oriented

capitalist economic models is more urgent and necessary than ever before Herein lies the political role of architecture and urban space including the ways through which they can be transformed and alternative political realities constituted The volume explores the methods and spatial practices required to activate the political dimension and the possibility for alternative practices to operate in the existing oppressive systems while not being swallowed by these structures Fostering new political consciousness is explored in terms of the following themes Events and Dissidence Biopolitics Ethics and Desire Climate and Ecology Urban Commons and Social Participation Marginalities and Postcolonialism Volume II embraces engagement across disciplines and offers a wide range of projects and critical analyses across the so called Global North and South This multidisciplinary collection of 36 chapters provides the reader with an extensive resource of case studies and ways of thinking for architecture and urban space to become more emancipatory Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license

High-performance Computer Architecture Harold S. Stone, 1993 This update of the popular book on computer architecture presents design ideas embodied in many high performance machines and stresses techniques for evaluating them Stone develops a proper understanding of the design process by treating the various trade offs that exist in designing choices and shows how good designs make efficient use of technology Features Teaches techniques for the design and analysis of high performance machines Develops students intuition for design by treating various tradeoffs that exist in design choices Discusses many important topics RISC architectures interconnection meshes Cache coherent and multiprocessors and Cache Memory Includes enhanced descriptions of RISC Processors Expands material on Cache Memory Analysis Current technology in RISC with a focused look on super scalar Additional memory models and techniques for doing Cache design New proposals for coherent memory systems in System C parallel processors Both design and thought problems and problems with limiting parameters are provided 0201526883B04062001 **Slicing Spaces: Performance of Architecture in Cinema** Gul Kacmaz Erk, Rebecca-Jane McConnell, 2023-05-26 As suggested in the title Slicing Spaces Performance of Architecture in Cinema this project slices through the multifaceted layers of film space The text investigates how architecture performs as an altruist proving that envired space is not merely a backdrop in film scenes but an active performing character The performance of architecture varies depending on what the filmmakers wish the viewer to feel whether it is fear compassion or joy Considerations take an interdisciplinary approach not solely observing film and architecture but also studying the likes of urbanism politics philosophy history psychology art and design The substantial spectrum of opinions from contributing authors allows the reader to absorb the diverse relationships of architecture in cinema inviting the reader to form their own opinions on the topic and inspiring a new way of thinking Slicing Spaces explores the interconnected relationship between architecture and film via distinct approaches to spaces of the city confinement actuality the psyche and the imagination Diverse views on cinematic architecture are probed such as the

psychological ramifications of film architecture the portrayals of the city as a character and the potentials of exploring fantastic places in film Overall the book focuses on the authoritative contribution of architecture to the realm of filmmaking It uncovers a path to look at lived spaces of architectural design from an alternative perspective be it interiors buildings or cities Utilising the architectural ingenuity of drawings and graphics the collection takes the reader on a visual journey as well as one through narratives Theater Design George C. Izenour, Professor George C Izenour, Vern Oliver Knudsen, Robert Bradford Newman, 1996-01-01 This text is a comprehensive reference to all aspects of theatre planning and construction and a history of theatre design from ancient times to the present Drawing on examples from Greek and Roman models to Renaissance and baroque theatres to contemporary buildings around the world it discusses such requirements as structural systems seating acoustics and visual volume in detail considering the optimum conditions for both musical and dramatic performance This edition includes as an appendix a new set of drawings in addition to the original 900 illustrations

Inhabiting the Meta Visual: Contemporary Performance Themes Helene G. Markstein, Arthur Maria Steijn, 2019-07-22 This volume was first published by Inter Disciplinary Press in 2016 Theatre and the many varied expressions of performance practice in live and mediated performance forms are by their nature inter disciplinary The goal of this volume is to develop discussion with a focus on the visual aspects of performance brought up by artists and researchers in various performance disciplines and practices The volume facilitates inter personal communication and the exchange of global perspectives to engage a community in meaningful dialogue Scenography describes the discipline of performing arts which include all elements of theatrical presentation As a definition here it is useful for this volume because it outlines the understanding of scenographic practice as a combination of numerous theatre practices that collaborate and include architecture lighting costume make up sound settings and stage properties movement as well as audience participation **The city trip guide for Sydney (Australia)** YouGuide Ltd, *Surfing, Street Skateboarding, Performance, and Space* Hunter H. Fine, 2018-09-15 *Surfing Street Skateboarding Performance and Space* On Board Motility draws from critical cultural studies political philosophy postcolonial studies urban sociology and poststructuralist theory in the context of human communication and performance to construct an epistemology of riding boards This book ponders why we move the way we do and examines the ways in which movements communicate developing as a result a theoretical perspective or board motility that is gestural and fluid moving in relation to shifting social and physical landscapes By combining the discourses and practices of critical theory and physical movement this text presents a sustained analysis of radical political philosophy In the book the symbolic narratives associated with each physical practice are deconstructed as their theoretical counterparts are thoroughly established Then through performance the author narrows the divide between these two forms of thinking verbal and nonverbal outlining and embodying an ontological and epistemological stoke in the process that emerges from riding boards on both waves and streets Architecture and Energy William Braham, Daniel Willis, 2013-07-18 Does energy consumption

influence architectural style Should more energy efficient buildings look different Can that look be used to explain or enhance their performance Architecture and Energy provides architects and architectural theorists with more durable arguments for environmental design decisions arguments addressing three different scales or aspects of contemporary construction By drawing together essays from the leading experts in the field this book engages with crucial issues in sustainable design such as The larger role of energy in forming the cultural and economic systems in which architecture is conceived constructed and evaluated The different measures and meanings of energy performance and how those measures are realized in buildings The specific ways in which energy use translates into the visible aspects of architectural style Drawing on research from the UK US Europe and Asia the book outlines the problems surrounding energy and architecture and provides the reader with a considered overview of this important topic Masterpieces? Philip Jodidio, Laurent Le Bon, Aurélien Lemonnier, 2010 *History, Performance and Conservation* Barry Bridgwood, Lindsay Lennie, 2013-09-13 Ideal for students of architectural technology this volume of the Technologies of Architecture series covers the technologies available and the processes necessary for the conservation of existing buildings and environments This book provides in a single text the tools for students to be able to evaluate such buildings as well as an extensive understanding of the mechanisms which cause their deterioration and knowledge of the technologies available to correct their status The ever higher standards set for buildings especially in energy conservation contexts demand that practitioners appreciate how the performance of existing structures can be enhanced which is also covered Considering the work of conservation within a holistic perspective and historical context this book is additionally invaluable for architecture and construction students
