$$3 + 7 + 5 = \underline{\quad}$$

1.OA.B.3

Apply properties of operations as strategies to add and subtract.

Commutative property of addition
If $8 + 3 = 11$, then $3 + 8 = 11$

Associative property of addition
 $2 + 6 + 4 = 12$ ↔ $2 + 10 = 12$

1.OA.B.4

Understand subtraction as an unknown-addend problem.

$$10 - 8$$

$$8 + 2 = 10$$

So...

$$10 - 8 = 2$$

1.OA.C.5

Relate counting to addition and subtraction.

Counting On

$$3 + 6 =$$

3, 4, 5, 6, 7, 8, 9

Counting Back

$$8 - 5 =$$

8, 7, 6, 5, 4, 3

teacher leaders will find information they need to begin adapting their courses and practices to ensure all students master the new and challenging material the standards present and graduate ready for college or career A practical lesson planning process to use with the Common Core based on Classroom Instruction That Works 2nd Ed is included along with three sample lessons LEARN THE ESSENTIALS OF THE COMMON CORE The grade level and subject specific Quick Start Guides in the Understanding the Common Core Standards series edited by John Kendall are designed to help school leaders and school staffs turn Common Core standards into coherent content rich curriculum and effective classroom level lessons

Uncovering Student Thinking in Mathematics, Grades K-5 Cheryl Rose Tobey, Leslie Minton, 2010-10-04 Finally a book to help teachers differentiate math instruction using their own individualized current data The practical simple to use formative assessments allow teachers to identify areas of difficulty correct misconceptions and guide learning Renee Peoples Fourth Grade Teacher and K 5 District Math Facilitator Swain County Schools NC This book offers ways for teachers to gain more insight into what their students know and don't know Carol Amos Teacher Leader Mathematics Coordinator Twinfield Union School VT 25 targeted probes that gauge students mathematics comprehension in Grades K 5 Quickly identify each child's level of understanding with these easy to use assessment tools This sequel to the bestseller Uncovering Student Thinking in Mathematics answers teachers requests for more strategies to monitor classroom learning in real time The authors provide 25 field tested probes brief easily administered assessments that can pinpoint students areas of struggle in mathematics Aligned with NCTM standards these grade appropriate probes are easy to implement immediately and help teachers Build on children's current understandings while addressing their identified difficulties Quickly and objectively evaluate specific math skills Determine students common mistakes and obstacles to learning math Measure learners abilities and compare them to performance objectives Tobey and Minton include their proprietary QUEST cycle model which provides teachers with the necessary tools to make sound instructional choices and improve all students mathematical knowledge *The Common Core, an Uncommon Opportunity* Judith K. March, Karen H. Peters, 2014 Because the Common Core requires bold action Why The Common Core an Uncommon Opportunity Why now Because it tackles a largely overlooked component of implementation how to redesign your instructional delivery system K 12 And you'll have to if you don't you'll be subject to the very same failure and frustration so many other districts and schools are experiencing What's more March and Peters describe how to integrate 21st Century Skills at the very same time It will help district leaders Develop structured consistent and organized teaching and learning practices Make district wide infrastructure adjustments for sustained reform Use best practices for sustained achievement and continuous curriculum review **Designing Mathematics or Science Curriculum Programs** National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on Science Education K-12 and the Mathematical Sciences Education Board, 1999-11-15 With the publication of the National Science Education Standards and the National Council of Teachers of Mathematics

Curriculum and Evaluation Standards for School Mathematics a clear set of goals and guidelines for achieving literacy in mathematics and science was established Designing Mathematics or Science Curriculum Programs has been developed to help state and district level education leaders create coherent multi year curriculum programs that provide students with opportunities to learn both mathematics and science in a connected and cumulative way throughout their schooling Researchers have confirmed that as U S students move through the grade levels they slip further and further behind students of other nations in mathematics and science achievement Experts now believe that U S student performance is hindered by the lack of coherence in the mathematics and science curricula in many American schools By structuring curriculum programs that capitalize on what students have already learned the new concepts and processes that they can learn will be richer more complex and at a higher level Designing Mathematics or Science Curriculum Programs outlines Components of effective mathematics and science programs Criteria by which these components can be judged A process for developing curriculum that is structured focused and coherent Perhaps most important this book emphasizes the need for designing curricula across the entire 13 year span that our children spend in elementary and secondary school as a way to improve the quality of education Ultimately it will help state and district educators use national and state standards to design or re build mathematics and science curriculum programs that develop new ideas and skills based on earlier ones from lesson to lesson unit to unit year to year Anyone responsible for designing or influencing mathematics or science curriculum programs will find this guide valuable *Differentiating Math Instruction, K-8* William N. Newton,2018-03-15 This volume examines how several key components of the mathematics education system in the United States fail to provide teachers with adequate and effective tools to teach mathematics in K 12 classrooms These components consist of teachers own learning experiences as students in K 12 classrooms their undergraduate or graduate trainings in mathematics and their in service professional development trainings Newton argues that unless we improve these system components as a whole and recognize the importance of teaching future mathematics teachers explicitly and rigorously the topics they are expected to teach teachers will continue to recycle a body of incoherent and incomprehensible mathematical knowledge to their students because these are the only types of mathematical knowledge they have at their disposal both in terms of what they themselves have learned as K 12 students and in terms of the mathematical resources available to them including the textbooks they rely on to teach as mathematics teachers
