Jones, Yolanda A. Parker, 2022-12-01 Empower your students as they reimagine the world around them through mathematics Culturally relevant mathematics teaching engages students by helping them learn and understand math more deeply and make connections to themselves their communities and the world around them The mathematics task provides opportunities for a direct pathway to this goal But many teachers ask how can you find adapt and implement math tasks that build powerful learners Engaging in Culturally Relevant Math Tasks helps teachers to design and refine inspiring mathematics learning experiences driven by the kind of high quality and culturally relevant mathematics tasks that connect students to their world With the goal of inspiring all students to see themselves as doers of mathematics this book provides intensive in the moment guidance and practical classroom tools that empower educators to shape culturally relevant experiences while systematically building tasks that are standards based It includes A pathway for moving through the process of asking imagining planning creating and improving culturally relevant math tasks Tools and strategies for designing culturally relevant math tasks that preservice novice and veteran teachers can use to grow their practice day by day Research based teaching practices seen through the lens of culturally relevant instruction that help students develop deep conceptual understanding procedural knowledge fluency and application in 6 12 mathematical content Examples milestones opportunities for reflection and discussion questions guide educators to strengthen their classroom practices and to reimagine math instruction in response This book is for any educator who wants to teach mathematics in a more authentic inclusive and meaningful way and it is especially beneficial for teachers whose students are culturally different from them

Children Framing Childhoods Wendy Luttrell, 2020-02-12 Urban educational research practice and policy is preoccupied with problems brokenness stigma and blame As a result too many people are unable to recognize the capacities and desires of children and youth growing up in working class communities This book offers an alternative angle of vision animated by young people s own photographs videos and perspectives over time It shows how a racially ethnically and linguistically diverse community of young people in Worcester MA used cameras at different ages 10 12 16 and 18 to capture and value the centrality of care in their lives homes and classrooms Luttrell s immersive creative and layered analysis of the young people s images and narratives boldly refutes biased assumptions about working class childhoods and re envisions schools as inclusive imaginative and care ful spaces With an accompanying website featuring additional digital resources childrenframingchildhoods.com this book challenges us to see differently and thus set our sights on a better future

Teaching Children Mathematics , 2008-08 Who's Who in Science and Engineering 2008-2009 Who's Who Marquis, Marquis Who's Who, 2007-12 Urbanization and Affordances that Promote Well-Being for (Urban) People and for

a Healthy Biosphere Stephan Barthel,Marketta Kyttä,2020-01-30 The world is urbanizing at an unprecedented rate It is estimated that in the near future urban landscapes for another ca 2 7 billion people will be built on planet Earth approximately converting land equivalent to the size of South Africa Such land conversion coupled with citizen densification increasing in equalities shifting diets and emerging technologies challenge human well being and pose ever increasing demand for resources generated by the Biosphere This Research Topic concentrates on the various ways urbanization can promote individual well being mental physical and social health as well as ecological health a healthy Biosphere What kind of affordances for human health promotion can urbanization include What kinds of affordances for a psychological connection with nature can urbanization include What kinds of nudges for pro environmental behavior and consumption decreasing detrimental consumption behaviors can be actively designed in urban settings The Research Topic at hand uses a transactional approach where an affordance can be understood as a non deterministic in situ precondition for a human activity enabled by relations between abilities of an individual with features of an environment We encourage a broad definition of the concept of affordances where the environment must not be restricted to the material biophysical environment alone but also could be combined with social immaterial features We see that the transactional approach of this Research Topic posits that meaning arises in relations between humans and their environment that it will be equally applicable to natural and designed environments and that it doesn t regard dichotomies like city contra nature or social contra ecological Hence this Research Topic is interested in if the transactional approach can be used as a conceptual tool not only for promotion of mental physical and social health in cities but simultaneously for unraveling relations at the micro scale in cities which can be used for solutions that also promote a healthy Biosphere Psychology and Mathematics Education Gila Hanna,Laura Macchi,Karin Binder,Laura Martignon,Katharina Loibl,2023-09-05 Modern Mathematics is constructed rigorously through proofs based on truths which are either axioms or previously proven theorems Thus it is par excellence a model of rational inquiry Links between Cognitive Psychology and Mathematics Education have been particularly strong during the last decades Indeed the Enlightenment view of the rational human mind that reasons makes decisions and solves problems based on logic and probabilities was shaken during the second half of the twentieth century Cognitive psychologists discovered that humans thoughts and actions often deviate from rules imposed by strict normative theories of inference Yet these deviations should not be called errors as Cognitive Psychologists have demonstrated these deviations may be either valid heuristics that succeed in the environments in which humans have evolved or biases that are caused by a lack of adaptation to abstract information formats Humans as the cognitive psychologist and economist Herbert Simon claimed do not usually optimize but rather satisfice even when solving problem This Research Topic aims at demonstrating that these insights have had a decisive impact on Mathematics Education We want to stress that we are concerned with the view of bounded rationality that is different from the one espoused by the heuristics and biases program

In Simon's bounded rationality and its direct descendant ecological rationality, rationality is understood in terms of cognitive success in the world correspondence rather than in terms of conformity to content-free norms of coherence e.g. transitivity
