Mathews Reezen 6.5

When we consider the level of performance that has been achieved with compound bows in the last several years, it certainly makes one curious about what it takes to bring 10 more feet per second plus a couple of percentage points in dynamic efficiency from next year's offering. This is what set me to comparing Mathews' 2006 Reezens to the 2005 EOY that I tested just under a year ago. The 2005 EOY achieved Rating Velocities of 240.9 feet per second with a 540-grain arrow and 289.1 fps with a 500-grain arrow. The dynamic efficiencies under these conditions were 83.45 percent and 89.42 percent, respectively. With a 600-grain arrow, the dynamic efficiency reached 84.63 percent. I view that as a pretty steep hill to climb for older bows. Yet, the folks up in Sparta, Wisconsin, and particularly the Nott-Cam master, Matt McPherson, have accomplished just that with the 2006 Reezens. Let's analyze some of the things they have done to
