Handbook On Policing In Central And Eastern Europe:

Handbook on Policing in Central and Eastern Europe Gorazd Meško, Charles B. Fields, Branko Lobnikar, Andrej Sotlar, 2013-04-16 Policing in Central and Eastern Europe has changed greatly since the fall of the Berlin Wall. Some Central and Eastern European countries are constituent members of the European Union while others have been trying to harmonize with the EU and international requirements for a more democratic policing and developments in accordance with Western European and international policing standards especially in regard to issues of legality and legitimacy. Changes in the police training system, basic and advanced internationalization of policing due to transnationalization of crime and deviance, new police organizational structures and agencies have impacted new cultures of policing from exclusively state to plural policing. This timely volume examines developments in the last two decades to learn the nature of these changes within Central and Eastern Europe and their impact on police culture as well as on society as a whole. The development of police research has varied widely throughout Central and Eastern Europe; in some countries it has developed significantly while in others it is still in its infancy. This work will allow for a transfer of ideas and models of police organization and policing is also needed to be studied closely with an aim to provide consistent and comparable data across all of the countries discussed. For the twenty countries covered, this systematic work provides short country-based information on police organization and social control, crime and disorder trends in the last 20 years with an emphasis on policing, police training and police educational systems, changes in policing in the last 20 years, police and the media, present trends in policing, public and private, multilateral, plural policing, policing urban and rural communities, recent research trends in research on policing, specificities of research on police and policing, researchers and the police, inclusion of police researchers in policy making and police practice and future developments in policing.

The Oxford Handbook of Police and Policing Michael Dean Reisig, Robert J. Kane, 2014 The police are perhaps the most visible representation of government. They are charged with what has been characterized as an impossible mandate: control and prevent crime, keep the peace, provide public services and do so within the constraints of democratic principles. The police are trusted to use deadly force when it is called for and are allowed access to our homes in cases of emergency. In fact, police departments are one of the few government agencies that can be mobilized by a simple phone call 24 hours a day, 7 days a week. They are ubiquitous within our society but their actions are often not well understood.

Handbook of Policing Tim Newburn, 2012-08-21 This new edition of the Handbook of Policing updates and expands the highly successful first edition and now includes a completely new chapter on policing and forensics. It provides a comprehensive but highly readable overview of policing in the UK and is an essential reference point combining the expertise of leading academic experts on policing and policing practitioners themselves.

Policing European Metropolises Elke Devroe, Adam Edwards, Paul Ponsaers, 2017-02-03 Understanding the politics of security in city regions is increasingly important for the study of contemporary policing. This book argues that national and international governing arrangements

are being outflanked by various transnational threats including the cross border terrorism of the attacks on Paris in 2015 and Brussels in 2016 trafficking in people narcotics and armaments cybercrime the deregulation of global financial services and environmental crime Metropolises are the focal points of the transnational networks through which policing problems are exported and imported across national borders as they provide much of the demand for illicit markets and are the principal engines generating other policing challenges including political protest and civil unrest This edited collection examines whether and how governing arrangements rooted in older systems of national sovereignty are adapting to these transnational challenges and considers problems of and for policing in city regions in the European Union and its single market Bringing together experts from across the continent Policing European Metropolises develops a sociology of urban policing in Europe and a unique methodology for comparing the experiences of different metropolises in the same country This book will be of value to police researchers in Europe and abroad as well as postgraduate students with an interest in policing and urban policy

Women Police in a Changing Society Mangai

Natarajan, 2016-02-11 Offering a fascinating account of the development of women police over the past twenty years this book refers to the author's extended research in India to examine how the Indian experience demonstrates a valuable alternative to the Anglo American model not only for traditional societies but for women police in the West as well With reference to the establishment in 1992 of all women units in Tamil Nadu this unique experiment proved highly successful in enhancing the confidence and professionalism of women officers and ensuring the effectiveness and efficiency of the police At a time when policing is being rethought all over the world not only in traditional societies the Tamil Nadu practice illustrates important lessons for western countries that are finding it increasingly difficult to recruit and retain women officers Natarajan's remarkable book is an important and original contribution to the literature on gendered policing which to date has concentrated almost exclusively on the US and British experience

with the formal scripts that were specifically designed for crisis management resulting in the wavering application of professional discretion and coercive powers Their different approaches were evident in some regions police were less dominantly visible compared to other regions where the police used a top down visible and repressive stance vis vis public alignment with COVID rules including the imposition of lockdown and curfews Some contributors draw on data from the COROPOL Corona Policing Monitor which collated data on crime plural policing and public order in Europe and around the world during the early phases of the COVID crisis Overall this book seeks to provide comparative critical insights and commentary as well as a practical and operational understanding of security governance during the COVID 19 crisis and the lessons learned to improve future preparedness
